Appendix 6:	Titles of development management and restoration policies	88

1. Introduction

1.1 Lincolnshire County Council ("the Council") is the Mineral and Waste Planning Authority for the county of Lincolnshire (figure 1) and is responsible for:

- the preparation, monitoring and review of Local Plans and Supplementary Planning Documents (SPDs) relating to minerals and waste for the county; and
- the determination of planning applications within the county for minerals and waste development.

1.2 Under the Planning and Compulsory Purchase Act 2004 ("the 2004 Act") as amended by the Localism Act 2011, the Council is required to periodically produce an Authority Monitoring Report (AMR) that provides information with respect to:

- the implementation of its timetable for the preparation of local plans and SPDs relating to minerals and waste, as set out in its Minerals and Waste Development Scheme; and
- the performance of the Council's policies set out in its adopted local plans and SPDs relating to minerals and waste.

1.3 Further information on what the AMR should contain is set out in regulation 34 of the Town and Country Planning (Local Planning) (England) Regulations 2012. This includes a requirement to give details of the actions that the Council has taken to ensure constructive engagement on strategic and cross boundary matters with other authorities and public bodies, including co-operation in the preparation of local plans and SPDs to meet the "duty to cooperate" requirements under section 33 of the 2004 Act.

1.4 This AMR is for the calendar years 2020 to 2024 and is based on information available during those years.

1.5 Throughout this monitoring period, the Lincolnshire Minerals and Waste Local Plan was in place comprising two parts:

- the Core Strategy and Development Management Policies (CSDMP), which was adopted on 1 June 2016; and
- the **Site Locations document (SLD)**, which was adopted on 15 December 2017.

1.6 No Supplementary Planning Documents were in place at the beginning of the year, and none were proposed.

1.7 One of the primary functions of this AMR is to identify whether there were any issues between January 2020 and December 2024 that affected the performance of

the adopted policies. Where issues are identified, the AMR sets out how they were being addressed.

Figure 1: The county of Lincolnshire

2. Implementation of the Minerals and Waste Development Scheme

- 2.1 Under the Planning and Compulsory Purchase Act 2004 (as amended), the Council is required to produce a Minerals and Waste Development Scheme (MWDS) setting out its programme for preparing its local plans and Supplementary Planning Documents (SPDs) relating to minerals and waste.
- 2.2 The Lincolnshire MWDS is monitored on an ongoing basis to assess progress against the timescales and targets set out within the document. This is reported in the Council's Authority Monitoring Reports (AMRs).
- 2.3 The MWDS in place in 2020 at the beginning of the monitoring period set out that the **Lincolnshire Minerals and Waste Local Plan** (LMWLP) would be composed of two Development Plan Documents (DPDs). Both of these documents were subsequently completed and comprised:
- **The Core Strategy and Development Management Policies** (CSDMP) adopted 2016 - which sets out the spatial strategy, core strategic policies and the development management policies to implement the strategy; and
 - **The Site Locations** document (SLD) adopted 2017 - which identifies specific sites and preferred areas for minerals extraction and for the location of waste facilities.

No SPDs were proposed in the MWDS.

- 2.4 As set out in the AMRs for previous years, both of the above documents were adopted in accordance with the timetables that were set out in the most up to date MWDS in place at the time.
- 2.5 Under regulation 10A of the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended), local planning authorities must review local plans and Statements of Community Involvement at least once every 5 years from their adoption date to ensure that the policies remain relevant and effectively address the needs of the local community. To meet this requirement the performance of the policies in both parts of the LMWLP has been reviewed. In line with the conclusions of this review, the LMWLP is in the process of being updated in full.
- 2.6 In the meantime the existing LMWLP still applies and this AMR, which reports on the effectiveness of the policies in the LMWLP, helps to identify any changes needed if a policy is not working or the targets are not being met. Thus, this AMR assists the Council in undertaking the aforementioned update process.

- 2.7 In light of the LMWLP review, a new Minerals and Waste Development Scheme (MWDS) was published during the 2020-2024 monitoring period. At its meeting on 19 February 2021, Full Council authorised the updating of the whole plan, and in conjunction approved a new MWDS as shown in Table 1.

Table 1: 2021 Minerals and Waste Development Scheme (MWDS)

Stage of Plan-production	Target
Consultation on Issues and Options, including a "call for sites" exercise (Regulation 18)	Spring 2022
Consultation on the Preferred Approach (Draft) of the new LMWLP (Regulation 18)	Spring 2023
Publication of the 'Proposed Submission' version of the new LMWLP (Regulation 19)	Spring 2024
Submission to Secretary of State	Summer 2024
Examination hearings	Autumn 2024
Adoption	Winter 2024/2025

- 2.8 Following the Issues and Options consultation, there were delays to this timetable and the subsequent milestones were not met. Updated key target milestones were provided in the Preferred Approach consultation which took place from July to September 2024. Table 2 shows the updated milestones and those milestones completed as of the end of 2024.

Table 2: Key target milestones for LMWLP preparation set out in the Preferred Approach consultation

Stage of Plan-production	Target	Completed
Consultation on Issues and Options, including a "call for sites" exercise (Regulation 18)	Summer 2022	June to August 2022
Consultation on the Preferred Approach (Draft) of the new LMWLP (Regulation 18)	Summer 2024	July to September 2024
Publication of the 'Proposed Submission' version of the new LMWLP (Regulation 19)	Spring 2025	TBC
Submission to Secretary of State	Summer 2025	TBC
Examination hearings	Winter 2025/26	TBC
Adoption	Winter 2026	TBC

3. Monitoring of the minerals and waste policies

- 3.1 In order to monitor the effectiveness of the CSDMP, the document provides a table of performance targets linked to output indicators, which provide a benchmark for measuring policy implementation. This monitoring framework also includes provision to monitor the objectives of both the CSDMP and the associated Sustainability Appraisal (SA), which the policies seek to deliver. Details of these objectives can be found in Appendices 4 and 5.
- 3.2 The SLD also provides a table of performance targets linked to output indicators in order to measure policy implementation, consistent with the framework set out in the CSDMP.
- 3.3 The assessment of policies has been carried out in three parts: the first part dealing with Core Policies that in general require more analysis; the second part, dealing with Development Management Policies and Restoration Policies, which tend to be more straight forward; and the third part dealing with policies in the SLD that relate to minerals and waste allocations.
- 3.4 A traffic light system has been adopted to indicate the current level of performance for each policy:

	Green circle - policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.
	Amber circle - some issues have been identified, but at present these are not considered to affect the policy's objectives.
	Red circle - policy is not meeting its objectives and remedial action will be necessary.

- 3.5 In addition, to assist in the monitoring of policies, the CSDMP requires the Council to routinely monitor other matters, such as the take-up in allocated sites and areas for both minerals and waste development. This, however, is now undertaken in the monitoring of the policies in the SLD.
- 3.6 For minerals, the CSDMP also requires the monitoring of the number and nature of applications that involve the extraction of mineral types which are not covered by specific policies. During the monitoring period, however, no such applications were received.

- 3.7 For waste, the Council is required to monitor, as far as possible, existing stock and changes in stock and capacities; waste arisings; and the amounts of waste recycled, recovered or going for disposal. This information is reported in section 4 under the relevant Core Policies.

4. Performance of the core policies

4.1 For each core policy of the CSDMP, this section provides a summary box setting out:

- which plan objective(s) and Sustainability Appraisal (SA) objective(s) are linked to the policy (see appendices 4 and 5 for details of those objectives);
- the prescribed indicator(s) and target(s) from the CSDMP;
- the result(s) for each year between 2020 and 2024
- the total for the whole five year period; and
- an assessment of the performance using the traffic light system described in section 3.

Each summary box is then followed by a more detailed explanation of the results and, where necessary, an explanation of how the performance has been assessed.

Policy M1: Recycled and secondary aggregate Plan objective: g SA objective: 10 Indicator: Percentage of relevant planning applications determined in accordance with policy M1 Target: 100% Result: 100% (5 year total)				
2020	2021	2022	2023	2024
100%	100%	100%	n/a	100%
Performance: 				
Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.				

M1.1 Nine relevant planning applications were assessed against policy M1 during the monitoring period as shown in Table M1.

Table M1: Applications assessed against Policy M1

Policy M1	2020	2021	2022	2023	2024
Granted in accordance with the policy	4	0	1	3	1
Refused in accordance with the policy	0	0	0	0	0
Granted contrary to the policy	0	0	0	0	0
Refused contrary to the policy	0	0	0	0	0

Policy M2: Providing for an adequate supply of sand and gravel

Plan objective: b

SA objective: 12

Indicator 1: Delivery of the identified annual provision by Production Area

Target: 100% accordance with policy M2

Results: *NB – As described in paragraph M2.3 these are now shown countywide rather than by Production Area)*

2020	2021	2022	2023	2024
105%	116%	103%	97%	Not yet available

Indicator 2: Type of sites (extensions/new)

Target: Priority to extensions

Result: Priority was given to extensions in the adopted Site Locations document, with only one new site allocated

Indicator 3: Location of new quarries by Production Area

Target: 100% location within Areas of Search

Result: 100% of allocations for new quarries in the adopted Site Locations document within areas of search

Indicator 4: Allocation of sites meeting the required annual and plan-period provision

Target: Through adopted Sites Location Plan

Result: Allocations have been made to meet the required plan provision in the adopted Site Locations document.

Indicator 5: Permissions for non-allocated sites

Target: Zero

Result: Seven applications for new mineral extraction were granted on non-allocated sites.

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

Policy Context – M2

M2.1 The aim of this policy is to ensure an adequate supply of sand and gravel for aggregate purposes by making provision over the plan period (2014 to 2031 inclusive) for the extraction of 42.66 million tonnes divided between three production areas:

- Lincoln/Trent Valley – 18.00 million tonnes (@ 1.00 million tonnes per annum);

- Central Lincolnshire – 9.00 million tonnes (@ 0.5 million tonnes per annum); and
- South Lincolnshire – 15.66 million tonnes (@ 0.87 million tonnes per annum)

Figure 2: Sand and gravel production areas in Lincolnshire

M2.2 As set out in policy SL1 of the adopted Site Locations document, the Council makes this provision through:

- existing permitted reserves;
- the release of further reserves at sites with resolutions to grant planning permission, but awaiting the completion of s106 planning obligations; and
- sites that have been allocated for future extraction.

Indicator 1: Delivery of the annual provision by Production Area

M2.3 The first indicator was therefore set up as a means of assessing whether the Council is on course to deliver the planned provision of sand and gravel within each production area for the plan period. However, as of 2021, one of these areas has too few operational sites to report the data at that level without the risk of breaching commercial sensitivity. Thus, these figures are now reported on a countywide basis. This is achieved by comparing the average annual sales with the planned provision rate for that part of the plan period which has lapsed, and for which sales data is available. The results are set out in Table M2 as percentages which can be interpreted as:

- results around 100% - the plan is on course to deliver the planned provision;
- results less than 100% - the plan is less likely to deliver the planned provision, which may indicate problems with supply or could simply be the result of low demand; and
- results over 100% - demand may exceed the planned provision over the plan period.

M2.4 In practice, it will be rare for the result in any given year to be exactly 100%, so the results need to be subject to close scrutiny. The Council in effect does this each year in its Local Aggregate Assessment, which is produced in accordance with the National Planning Policy Framework. For each year, the latest sales information available is from the preceding year as set out in the Lincolnshire Local Aggregate Assessments ("the LAAs"). The LAAs should be read in conjunction with this AMR.

M2.5 Table M2 shows annual sand and gravel sales on this new countywide basis. It indicates that average annual sales since 2014 have exactly matched the planned annual provision.

Table M2: Delivery of CSDMP planned annual provision of sand and gravel

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Average Annual Sales
CSDMP planned annual provision (MTe)	2.37	2.37	2.37	2.37	2.37	2.37	2.37	2.37	2.37	2.37	
Lincolnshire Annual sand and gravel sales (MTe)	2.15	2.19	2.17	2.38	2.32	2.46	2.49	2.76	2.45	2.31	2.37
% of planned provision	91%	92%	92%	100%	98%	104%	105%	116%	103%	97%	100%

M2.6 The LAA does highlight a growing trend in exports of sand and gravel from Lincolnshire to neighbouring counties whilst demand within Lincolnshire has been low. Although this does not present any current issues with supply, this will need to be closely monitored going forward, particularly if demand from within Lincolnshire increases.

M2.7 It is therefore considered that during the monitoring period the policy delivered a sufficient supply of sand and gravel area to meet the level of demand and, as a result, the policy objectives were being met.

Indicator 2: Type of Sites: extensions/new

M2.8 Policy M2 makes provision for the release of sand and gravel reserves and gives priority to extensions to Active Mining Sites through the adopted Site Locations Document. Policy SL1 of the SLD allocates nine extensions to existing active mining sites and one new quarry. It is therefore considered that this aspect of the policy has met its objectives.

Indicator 3: Location of new quarries by Production Area

M2.9 Where new quarries are allocated in the SLD, Policy M2 specifies that they should be located within an Area of Search. Only one new site is allocated in the SLD, known as Manor Farm, Greatford (MS25-SL), which is located in an Area of Search. It is therefore considered that this aspect of the policy's objectives has been met.

Indicator 4: Allocation of sites meeting the required annual and plan period provision

M2.10 Policy SL1 of the adopted SLD allocates sufficient sites to meet the annual and plan period provision for sand and gravel set out in policy M2. Some of the allocations are not required until well into the plan period, and as a result will only be partially worked during this period. The overall allocation in each production area therefore exceeds the requirements of policy M2 and provides a degree of flexibility should demand exceed forecast levels. The delivery of allocated sites is considered in detail under policy SL1 in section 6.

Indicator 5: Permissions for non-allocated sites

M2.11 Seven planning permissions were granted for mineral extraction on non-allocated land to which Policy M2 is applicable, these being:

- PL/0026/22
- PL/0037/22
- PL/0129/22
- PL/0130/22
- PL/0088/22

- PL/0021/23
- PL/0083/23

Further details of each application are set out under policy M4. They each represent an extension to an existing quarry but, given that they have been permitted for reasons including meeting a local shortfall in the sand and gravel landbank, and preventing the unnecessary sterilisation of mineral resources, it is considered that these decisions do not undermine the core purpose of policy M2.

Policy M3: Landbank of sand and gravel

Plan objective: b.

SA objective: 11, 12

Indicator: Level of landbank for sand and gravel aggregate within each Production Area.

Target: Minimum landbank of 7 years within each Production Area calculated in accordance with the latest LAA.

Result: NB – As described in paragraph M3.1 these are now shown countywide rather than by Production Area

2019	2020	2021	2022	2023
11.66 years	9.50 years	9.68 years	9.62 years	8.68 years

Minimum 7 year landbank achieved (see explanatory text below)

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

M3.1 The LAA concludes that the landbank of permitted reserves within each Production Area should be based on the "10 year average sales" approach. That is, the level of permitted reserves (in tonnes) should be divided by the average level of sales for the preceding 10 year period (in tonnes per annum) to give the length of the landbank (in years) as set out in Table M3. Whilst this was previously reported as a separate figure for each Production Area, as of 2021, one of these areas has too few operational sites to report the data at that level without the risk of breaching commercial sensitivity. Thus, these figures are now reported on a countywide basis.

Table M3: Sand and gravel landbank (as at 31 December each year)

	2019	2020	2021	2022	2023
Permitted reserves as at 31st December (Mte)	24.61	20.70	21.93	22.36	20.57
Annual rate based on 10 year average sales (Mte)	2.11	2.18	2.27	2.33	2.37

	2019	2020	2021	2022	2023
Landbank based on 10 year average sales (years)	11.66	9.50	9.68	9.62	8.68

Source: Lincolnshire Local Aggregates Assessments (each of which uses the previous year's data)

- M3.2 The table demonstrates that the landbank exceeded the 7 year minimum target in each year, meeting the objectives of Policy M3.

Policy M4: Proposals for sand and gravel extraction Plan objective: a & c SA objective: 7, 8 Indicator: Percentage of relevant planning applications determined in accordance with policy M4 Target: 100% Result: 100% (5 year total)				
2020	2021	2022	2023	2024
n/a	n/a	100%	100%	100%
Performance:  Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.				

- M4.1 Nine planning applications involving new sand and gravel extraction were determined during the monitoring period as shown in Table M4.1.

Table M4.1: Relevant applications assessed against Policy M4

Policy M4	2020	2021	2022	2023	2024
Granted in accordance with the policy	0	0	3	3	3
Refused in accordance with the policy	0	0	0	0	0
Granted contrary to the policy	0	0	0	0	0
Refused contrary to the policy	0	0	0	0	0

- M4.2 Of the nine granted permissions, two were located on a site allocated in the Site Locations Document as listed in Table M4.2.

Table M4.2: Relevant permissions granted under Policy M4

Reference	Location	Description	SLD Allocation?
PL/0082/20	Land at King Street, Greatford	To extract and process sand and gravel and to progressively restore the site to a mixture of agricultural land, nature conservation area and an agricultural water reservoir	MS25-SL
PL/0026/22	West Deeping Quarry, King Street, West Deeping	For the proposed southern extension to existing sand and gravel extraction operations with restoration to low level agriculture and amenity/nature conservation at land south of the existing quarry	No
PL/0037/22	Manor Pit, Baston Outgang Road, Baston	For the extraction of sand and gravel beneath former Plant Site with enhanced restoration to amenity/nature conservation	No
PL/0129/22	West Deeping Quarry, King Street, West Deeping	To vary condition 3 of planning permission S19/0486 - to amend the mineral extraction boundary and reduce the standoff distance from Crown Farm	No
PL/0130/22	West Deeping Quarry, King Street, West Deeping	To vary condition 2 of planning permission S19/0497 to amend the mineral extraction boundary and reduce the standoff distances from Rectory Farm, Crown Farm and The Lodge	No
PL/0021/23	Manor Pit, Baston Outgang Road, Baston	For extraction of sand and gravel beneath former readymix plant site with enhanced restoration to amenity/nature conservation	No
PL/0087/22	Baston No.2 Quarry, Langtoft Outgang Road, Langtoft	For a south-western extension to sand and gravel workings with restoration to biodiversity and a lake	MS27-SL
PL/0088/22	Baston No.2 Quarry, Langtoft Outgang Road, Langtoft	For the retention of the Baston No.2 Plant Site, internal haul roads and ancillary operations including weighbridge, office, wheelwash and established quarry access as well as extraction of underlying mineral and subsequent restoration	No

Reference	Location	Description	SLD Allocation?
PL/0083/23	West Deeping Quarry, King Street, West Deeping	The removal of approximately 80,000 tonnes of sand and gravel	No

Policy M5: Limestone

Plan objective: a & c

SA objective: 7, 8

Indicator 1: Percentage of relevant planning applications determined in accordance with policy M5

Target: 100%

Result: 100% (5 year total)

2020	2021	2022	2023	2024
n/a	n/a	100%	100%	100%

Indicator 2: The delivery of the identified annual provision

Target: 100%

Result: 171%

Performance:

Some issues have been identified, but at present these are not considered to affect the policy's objectives.

Policy context – M5

- M5.1 The CSDMP sets the level of provision for limestone aggregate at 11.16 million tonnes for the plan period 2014 to 2031, equating to an annual requirement of 0.62 million tonnes per year. At the beginning of the plan period, however, the total level of permitted reserves in the county stood at 40.25 million tonnes, providing a surplus of 29.09 million tonnes over the plan period. As a result, policy M5 is a relatively restrictive policy, which only allows further reserves to be released where it is demonstrated that they meet a proven need that cannot be met by existing sites/sources.

Indicator 1: Percentage of relevant planning applications determined in accordance with policy M5

- M5.2 Four planning applications involving new limestone aggregate extraction were determined during the monitoring period as shown in Table M5.1.

Table M5.1: Relevant applications assessed against Policy M5

Policy M5	2020	2021	2022	2023	2024
Granted in accordance with the policy	0	0	1	1	2
Refused in accordance with the policy	0	0	0	0	0
Granted contrary to the policy	0	0	0	0	0
Refused contrary to the policy	0	0	0	0	0

M5.3 None of the four granted permissions as listed in Table M5.2 were located on allocated site, as the Site Locations document only allocates sites for sand and gravel extraction.

Table M5.2: Relevant permissions granted under Policy M5

Reference	Location	Description	SLD Allocation?
PL/0019/22	Ropsley Quarry, Long Hollow Lane, Ropsley	To vary conditions 2, 3, 6, 7, 8, 26 and 27 of planning permission S21/0804, to extract the northern area of the quarry	No
PL/0063/23	Colsterworth Triangle, Crabtree Road, Colsterworth	To vary condition 6 and remove condition 20 of planning permission s15/3028 to remove stone under area occupied by weighbridge and wheelwash	No
PL/0011/23	Great Ponton Quarry, Dallygate Lane, Great Ponton	For an 8.6 hectare northern extension to the existing limestone quarry	No
PL/0094/23	Land South of Dunston Quarry, Lincoln Road, Dunston	For a southern extension to Dunston quarry	No

Indicator 2: The Delivery of the identified annual provision

M5.4 This indicator was set up as a means of assessing whether the Council is on course to deliver the planned provision of limestone aggregate for the plan period by comparing the average annual sales with the planned annual provision rate for that part of the plan period which has lapsed, and for which sales data is available. These are compared in table M5.3 below.

Table M5.3: Delivery of CSDMP planned annual provision of limestone aggregate

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Average Annual Sales
Lincolnshire CSDMP planned annual provision (MTe)	0.62	0.62	0.62	0.62	0.62	0.62	0.62	0.62	0.62	0.62	
Lincolnshire Annual limestone aggregate sales (MTe)	0.38	0.43	0.76	0.85	1.28	1.45	1.17	1.39	1.50	1.40	1.06
% of planned provision	61%	69%	123%	138%	206%	234%	188%	225%	242%	226%	171%

M5.4 The table demonstrates significant variations in production, with annual sales lower than the CSDMP planned annual provision rate during the first two years but increasing above that rate in subsequent years. While various factors may cause the fluctuations, this suggests that there has been some sustained growth in wider sales - with sales distribution data demonstrating an increasing catchment area for Lincolnshire Limestone products.

M5.5 To reflect the higher level of demand, the method for calculating the landbank was adjusted in the 2019 LAA from that used previously (using the last 10-years average sales approach). Instead the landbank is now calculated using the last 3-years average sales (1.432MTe in the LAA 2023 data). Using this approach, the permitted reserves of limestone at the end of 2023 (14.037MTe) provide a landbank of 9.80 years. Although no sites have been allocated in the SLD, these reserves should last beyond the plan period.

M5.6 Thus, although the policy has been effective despite sales increasing to considerably above the plan provision, this indicates that planned provision needs to be reviewed.

Policy M6: Chalk

Plan objective: a, c

SA objective: 7, 8

Indicator: Percentage of relevant planning applications determined in accordance with policy M6

Target: 100%

Result: 100%

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

Policy context

- M6.1 The CSDMP does not make specific provision for chalk extraction as it is considered that there are more than sufficient reserves to meet the low demand for chalk over the plan period. Accordingly policy M6 requires any proposals for extensions to existing chalk extraction sites or new chalk extraction sites to meet a proven need that cannot be met by existing sites.

Indicator

- M6.2 The only application assessed against policy M6 across the entire monitoring period was in 2024. Planning application PL/0081/24 was for an extension to an existing chalk quarry and was approved in accordance with the policy.

Policy M7: Historic building stone

Plan objective: a, b, c, k

SA objective: 7, 8

Indicator: Percentage of relevant planning applications determined in accordance with policy M7

Target: 100%

Result: 100%

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

- M7.1 The only application assessed against policy M7 across the entire monitoring period was in 2020. Planning application PL/0040/20 was for an extension to an existing historic building stone quarry and was approved in accordance with the policy.

Policy M8: Silica sand

Plan objective: a, b, c

SA objective: 7, 8

Indicator: Percentage of relevant planning applications determined in accordance with policy M8

Target: 100%

Result: N/A

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

- M8.1 No planning applications were assessed against this policy during the monitoring period (no planning applications were received for silica sand extraction).

Policy M9: Energy minerals Plan objective: a, c SA objective: 7, 8 Indicator: Percentage of relevant planning applications determined in accordance with policy M9 Target: 100% Result: 100% Performance:  Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.
--

- M9.1 Seven planning applications were assessed against Policy M9 during the monitoring period as shown in Table M9.1.

Table M9.1: Applications assessed against Policy M9

Policy M9	2020	2021	2022	2023	2024
Granted in accordance with the policy	2	1	2	0	1
Refused in accordance with the policy	0	1	0	0	0
Granted contrary to the policy	0	0	0	0	0
Refused contrary to the policy	0	0	0	0	0

- M9.2 The planning permissions granted in accordance with Policy M9 were as shown in Table M9.2.

Table M9.2: Applications granted in accordance with Policy M9

Year	Granted	Refused
2020	PL/0060/20 PL/0067/20	
2021	PL/0073/21	PL/0037/21
2022	PL/0176/21 PL/0078/22	
2024	PL/0135/22	

- M9.3 Application PL/0037/21 for a sidetrack drilling operation, associated testing and long term oil production at Biscathorpe was refused in accordance with Policy M9 (due to non compliance with DM1 and DM5) but subsequently approved at appeal in 2023

on other grounds. That approval itself was quashed in 2024, which left its status as of this Monitoring Period (December 2024) as refused in accordance with Policy M9.

Policy M10: Underground gas storage

Plan objective: a, c

SA objective: 7, 8

Indicator: Percentage of relevant planning applications determined in accordance with policy M10

Target: 100%

Result: N/A

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

M10.1 No planning applications were assessed against this policy during the monitoring period (no planning applications were received for underground gas storage).

Policy M11: Safeguarding of mineral resources

Plan objective: f, k

SA objective: 10

Indicator: Number of planning applications that are granted permission where the county council has expressed the view that the proposals would be contrary to policy M11

Target: Zero

Result: Three of 14 objections (5 year total – see paragraph M11.5 for details)

2020	2021	2022	2023	2024
1 of 8	0 of 2	2 of 3	0 of 1	No objections

Performance:

Policy is not meeting its objectives and remedial action will be necessary.

Policy context

M11.1 This policy aims to safeguard important mineral resources for potential future use by preventing incompatible forms of development, such as housing, from sterilising the deposits. Under the safeguarding procedure, the district councils of Lincolnshire, which are the Local Planning Authorities (LPAs) for most forms of non-minerals/waste development, are required to consult the Council with respect to planning applications falling within Mineral Resource Safeguarding Areas, other than

those exempted by the policy. Where applications are caught by this policy, they should be accompanied by a Minerals Resource Assessment (MRA) (see section 5 of the CSDMP).

Indicator

M11.2 During the monitoring period, the Council was consulted by the district councils on a number of proposals which fell within the exclusion criteria set out within the policy. As such no comments were necessary. There were also multiple pre-application advice consultations to which appropriate responses were made.

M11.3 The remainder of the consultations have been split into three further categories: "**Objections**" and "**No Objections**", to which a relevant response was sent to the related LPA; and "**Unreasonable**" – a category created as a result of issues previously highlighted in the 2017, 2018 and 2019 monitoring reports where it was considered that it would be disproportionate to pursue further information. The number in each category is shown in Table M11.

Table M11: Result of consultations received between 2020 & 2024

Objections – Response sent	14
No Objections – Response sent	202
Unreasonable to respond	388

M11.4 Where objections were lodged by the Council, most resulted in a decision (either to approve or refuse) that was in accordance with the policy.

M11.5 There were, however, three decisions that were not in accordance with policy M11. In two cases, despite the Council requesting one, no MRA was ever provided. In the third, whilst an MRA was provided, the Council requested further clarification which was not forthcoming.

M11.6 Despite the three inconsistent decisions highlighting some on-going issues with the implementation of policy M11 by LPAs, it may be concluded that where the Council makes objections on safeguarding grounds, these are for the most part being resolved in accordance with the policy.

M11.7 Previous monitoring reports have highlighted that, during the "bedding in" period for the policy, questions were raised in respect of the exemptions to the Policy. These exemptions were seen as too limited with the policy effectively taking a blanket approach (i.e. requiring most non-mineral applications within mineral safeguarding areas be accompanied by a MRA in the first instance). Representations were received from LPA planners, developers and applicants, questioning the scope of the policy and the reasonableness of its application. These concerns were due to the

cost implications of preparing MRAs for application sites that in their view were unsuitable for mineral extraction (either full or partial).

M11.8 In light of the above, officers decided to screen consultations that were received without a supporting MRA and make a judgement in each case as to whether requesting an MRA would be unreasonable, and to focus on major developments where there are genuine concerns of sterilisation. This approach was also considered necessary due to the burden on Council resources in responding multiple times to each consultation in order to get the information that was required by the policy. As indicated in Table M11, this remains the case with nearly 400 “unreasonable” cases identified during this monitoring period.

M11.9 Thus, the policy catches a large number of applications where it would be considered unreasonable to require a MRA. While these applications have not been recorded as departures in the performance indicator, technically they do not comply with the policy. Consequently, if they were included, the indicator would have moved significantly away from the target. However, they do not fall under the indicator definition that “the county council has **expressed the view** that the proposals would be contrary to policy M11”.

M11.10 It is therefore concluded that this policy does not provide a practical or an efficient approach for safeguarding mineral resources, and that it would benefit from being reviewed. Its performance has therefore been identified as "red".

Policy M12: Safeguarding of existing mineral sites and associated minerals infrastructure

Plan objective: a, f, k

SA objective: 7, 8

Indicator: Number of planning applications that are granted permission where the county council has expressed the view that the proposals would be contrary to policy M12

Target: Zero

Result: Zero of three objections (5 year total – see paragraph M12.4 for details)

2020	2021	2022	2023	2024
No objections	No objections	0 of 3	No objections	No objections

Performance: 

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

Policy Context

M12.1 This policy safeguards existing mineral sites and associated infrastructure (excluding sites classified as dormant under the Planning and Compensation Act 1991 or the Environment Act 1995) from the encroachment of incompatible development, and includes a 250m buffer zone around each site. Sites safeguarded under this policy are included in appendix 1 (Lincolnshire mineral and waste sites), which will be updated on an annual basis. District councils as LPAs are required to consult the Council on all applications they receive that fall within a minerals site/infrastructure safeguarding area, other than for the specific exemptions set out in the policy. Where applications are caught by this policy, they should be accompanied by a Mineral Site/Infrastructure Assessment (MSIA).

Indicator

M12.2 During the monitoring period, the Council was consulted by the district councils on a number of proposals which fell within the exclusion criteria set out within the policy. As such no comments were necessary. There were also multiple pre-application advice consultations to which appropriate responses were made.

M12.3 The remainder of the consultations have been split into three further categories: "**Objections**" and "**No Objections**", to which a relevant response was sent to the related LPA; and "**Unreasonable**" – a category created as a result of issues previously highlighted in the 2017, 2018 and 2019 monitoring reports where it was considered that it would be disproportionate to pursue further information. The number in each category is shown in Table M12.

Table M12: Result of consultations received between 2020 & 2024

Objections – Response sent	3
No Objections – Response sent	10
Unreasonable to respond	17

M12.4 Where objections were lodged by the Council, all resulted in a decision (either to approve or refuse) that was in accordance with the policy. Whilst one of those approvals was contrary to the Council's objections with regard to Policy M11, concerns regarding M12 were resolved satisfactorily. It may thus be concluded that, where the Council makes objections, these are being resolved in accordance with the policy.

Policy M13: Associated industrial development

Plan objective: a
SA objective: 7, 8

Indicator: Percentage of relevant planning applications determined in accordance with policy M13

Target: 100%

Result: 100% (5 year total)

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

Policy Context

M13.1 This policy deals with planning applications for industrial development within or in proximity to mineral sites. To comply with the policy, the development must, as a starting point, have close links with the minerals development.

Indicator

M13.2 12 planning applications were assessed against policy M13 during the monitoring period and all were granted in accordance with the policy.

M13.3 The 2017 AMR highlighted some issues with the application of this policy and recorded the performance as "amber". The amber status was retained up to the 2019 AMR as the one further relevant application provided insufficient supporting evidence. However, in light of these 12 subsequent examples, it is considered safe to move back to "green" status.

Policy M14: Irrigation reservoirs

Plan objective: a

SA objective: 7, 8

Indicator: Percentage of relevant planning applications determined in accordance with policy M14

Target: 100%

Result: 100%

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

M14.1 One planning application was assessed against this policy during the monitoring period and was granted in accordance with the policy. Indeed, that case (PL/0132/21) demonstrated the effectiveness of the policy as the original decision was deferred and eventually granted once M14 had been complied with.

Policy M15: Borrow Pits

Plan objective: a, c

SA objective: 7, 8

Indicator: Percentage of relevant planning applications determined in accordance with policy M15

Target: 100%

Result: N/A

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

M15.1 No planning applications were assessed against this policy during the monitoring period (no planning applications were received for borrow pits).

Policy W1: Future requirements for new waste facilities.

Plan objective: a, d, e

SA objective: 5, 7, 8, 12

Indicator 1: Allocation of sites to meet the capacity gaps identified in table 9 [of the CSDMP], except for inert landfill and hazardous landfill.

Target: Through adopted Site Locations document

Result: Achieved through the allocation of sites and areas in the adopted Site Locations document.

Indicator 2: Review of capacity gaps

Target: Accordance with Annual Monitoring Report.

Result: The adopted Site Locations document primarily allocates preferred areas rather than specific sites. Consequently the total area allocated is many times greater than is necessary to accommodate the additional waste management capacity needed to fill the remaining capacity gaps identified for the plan period.

Performance:

Some issues have been identified, but at present these are not considered to affect the policy's objectives.

Indicator 1: Allocation of sites to meet the capacity gaps identified in table 9 [of the CSDMP], except for inert landfill and hazardous landfill.

W1.1 The SLD was adopted on 15 December 2017 and included a specific policy (SL3) for the provision of land for waste development which incorporates the allocation of 1 specific site and 16 preferred areas. The preferred areas, based upon industrial estates, are made up of numerous plots of land extending to over 650 hectares (170

hectares vacant at the time of assessment in 2016), well in excess of the area needed to accommodate the number of facilities predicted in the CSDMP (see table 10 of the CSDMP). This approach therefore provides flexibility should the need for new waste management facilities exceed the forecasts in the CSDMP.

- W1.2 The take up of allocations proposed for waste development is monitored under Policy SL3. For the reasons set out under that policy, the approach of allocating sites and areas for waste management has not proved effective in the delivery of new waste management capacity. For this reason the performance of both policies has been downgraded to "amber".

Indicator 2: Review of capacity gaps.

- W1.3 The CSDMP set out the baseline capacity gaps for the plan period 2014-2031 which was underpinned by the production of a comprehensive Waste Needs Assessment (WNA). To inform the submission and examination of the second part of the Lincolnshire Minerals and Waste Local plan (LMWLP), the Site Locations document, a Waste Needs Assessment Update (WNAU) was published in May 2017 in order to take into account more recent data due to the passage of time since the original WNA was produced.
- W1.4 The 2017 WNAU also took into account planning permissions granted for new waste management capacity up to the end of 2016, which was updated to incorporate new waste data, site assessments and planning permission reviews in subsequent AMRs. The 2018 dataset that was used as the starting point for the calculations in the 2019 AMR is set out in Table W1.
- W1.5 Table W1 summarises the predicted capacity gaps at three intervals over the plan period corresponding to key points in achieving the assumed recycling and landfill diversion performance rates. The negative figures identify capacity surpluses.

Table W1: CSDMP forecast capacity gaps by facility type 2015, 2020, 2025 and 2031 – growth with median recycling scenario (- indicates a capacity surplus)

Function	Gap 2015	Gap 2020	Gap 2025	Gap 2031
Mixed waste recycling	114,483	8,404	39,782	73,004
Specialised recycling	-347,034	-374,361	-364,350	-363,294
Composting	-366,755	-357,146	-352,910	-348,124
Treatment plant	-125,452	-433,915	-438,061	-442,795
Energy recovery	-5226	93,564	101,604	110,811
Specialised incineration	36220	36,177	36,195	36,214

Function	Gap 2015	Gap 2020	Gap 2025	Gap 2031
Aggregates recycling	-65,995	-109,514	-43,241	27,356
Non-hazardous landfill	-105,321	-70,290	-100,346	-132,100
Inert landfill	-97,654	25,792	34,178	42,863
Hazardous landfill	9,496	9,631	9,769	9,912

[All figures in tonnes (rounded)]

Source: Lincolnshire Authority Monitoring report 2018

- W1.6 During the 2020 to 2024 monitoring period, 128 waste related planning applications were determined by the Council (see appendix 3). Previous AMRs have included an assessment of the impact of any newly consented waste management capacity, and any loss of capacity elsewhere, on the capacity gaps shown above in Table W1, including any impacts on specific waste streams. The most recent example of this is shown in the 2019 AMR which can be viewed here:

<https://www.lincolnshire.gov.uk/directory-record/74022/minerals-and-waste-monitoring-reports->

However, as part of the development of a new LMWLP, such a review is underway to accompany a new WNA, so this work has not been replicated here.

- W1.7 Also absent from this AMR, and to be included with the new WNA work, is a review of the waste management site list to reflect newly consented capacity and any capacity lost such as where planning permissions have lapsed through non-implementation or have been superseded by a change of use. Thus, the list shown in Appendix 1 is the unchanged list from the 2019 AMR.

Policy W2: Low level non-nuclear radioactive waste

Plan objective: a, e

SA objective: 7, 8

Indicator: Percentage of relevant planning applications determined in accordance with policy W2

Target: 100%

Result: N\A

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

- W2.1 No planning applications were assessed against this policy during the monitoring period (no planning applications were received for low level non-nuclear radioactive waste).

Policy W3: Spatial strategy for new waste facilities

Plan objective: a, e

SA objective: 7, 8, 11

Indicator: Percentage of relevant planning applications determined in accordance with Policy W3

Target: 100%

Result: 100%

Performance: 

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

- W3.1 Policy W3 was cited in relation to 50 relevant planning applications during the monitoring period. 46 of these applications were granted in accordance with the policy, and four were refused in accordance with the policy.

Policy W4: Locational criteria for new waste facilities in and around main urban areas

Plan objective: a, e

SA objective: 7, 8

Indicator: Percentage of relevant planning applications determined in accordance with policy W4

Target: 100%

Result: 100%

Performance: 

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

- W4.1 Policy W4 was cited in relation to 32 relevant planning applications during the monitoring period. 30 of these applications were granted in accordance with the policy, and two were refused in accordance with the policy.

Policy W5: Biological treatment of waste including anaerobic digestion and open-air composting

Plan objective: a, e

SA objective: 7, 8

Indicator: Percentage of relevant planning applications determined in accordance with policy W5

Target: 100%

Result: 100%

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

- W5.1 19 planning applications were assessed against policy W5 during the monitoring period. 17 of these applications were granted in accordance with the policy, and two were refused in accordance with the policy.

Policy W6: Landfill

Plan objective: a, e

SA objective: 7, 8

Indicator: Percentage of relevant planning applications determined in accordance with policy W6

Target: 100%

Result: 100%

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

Policy Context

- W6.1 Policy W6 sets out a strict approach to landfill, which only allows planning permission to be granted where several criteria are met, including: demonstrating that current capacity within the county is insufficient; that there would be long term landscape improvements; that there would be no significant delay to restoration of existing waste disposal sites; and all other relevant policies in the plan are met.

Indicator

- W6.2 Two planning applications were assessed against policy W6 during the monitoring period, both of which stated they were granted in accordance with the policy as set out below.
- W6.3 Planning applications PL/0029/20 and PL/0062/22 both referred to importing inert material for site restoration purposes, thus creating additional landfill capacity. Thus,

although each case officer noted that as per policy W1 there was not a quantitative need or requirement to create new inert landfill void space capacity, both permissions were granted on the basis of offering a long term improvement to the local landscape and character of the area, alongside other exceptional circumstances.

- W6.4 Whilst the 2019 AMR raised concerns and downgraded the performance to “amber”, no further concerns have occurred between 2020 and 2024 so the performance has been reinstated as “green”.

Policy W7: Small scale waste facilities

Plan objective: a, e

SA objective: 7, 8

Indicator: Percentage of relevant planning applications determined in accordance with policy W7

Target: 100%

Result: 100%

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

- W7.1 19 planning applications were assessed against policy W7 during the monitoring period. 13 of these applications were granted in accordance with the policy, and six were refused in accordance with the policy.

Policy W8: Safeguarding waste management sites

Plan objective: a,

SA objective: 7, 8

Indicator: Number of planning applications granted planning permission where the county council has expressed the view that the proposals would be contrary to policy W8.

Target: Zero

Result: Zero

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

Policy Context

- W8.1 Policy W8 seeks to safeguard existing and allocated waste management sites from redevelopment to non-waste uses and prevent the encroachment of incompatible development. A list of waste sites safeguarded under this policy is set out in appendix 1 of this report (Lincolnshire Mineral and Waste Sites), and this is currently being reviewed alongside the Waste Needs Assessment for the updated LMWLP. Unlike the Mineral Sites Safeguarding Policy (Policy M12), this safeguarding policy does not include a designated safeguarding area or buffer zone around each waste site. This is because waste management activities are very diverse in nature, with some waste facilities having a far greater impact on the surrounding area than others.
- W8.2 The district councils have therefore been advised that, when they receive a planning application in proximity to a safeguarded waste management site, they should assess whether there is likely to be a conflict between the two - taking into account the nature of the waste management activities and the sensitivity of the proposed development to those activities. It is the responsibility of district councils to ensure the Council is consulted in relevant circumstances.

Indicator

- W8.3 During the monitoring period the Council responded to 29 planning applications and four pre-application enquiries being considered by district councils that had the potential to affect existing waste management facilities or allocated waste areas. Although, where appropriate, the district council was reminded of the existence of the safeguarded site, and of matters to consider, no formal objections were raised by the Council in its responses to any of these cases when considering the requirements of policy W8.
- W8.4 Policy W8 was also referenced in four planning applications determined by the Council during the monitoring period, all of which were granted in accordance with the policy.

Policy W9: Waste water and sewage treatment works

Plan objective: a, e
SA objective: 7, 8

Indicator: Percentage of relevant planning applications determined in accordance with policy W9

Target: 100%
Result: 100%

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

- W9.1 Four planning applications were assessed against Policy W9 during the monitoring period, all of which were granted in accordance with the policy.

5. Performance of the development management and restoration policies

- 5.1 The CSDMP contains 17 development management policies, which deal with the impacts of proposed development on the environment and local amenity. It also includes four restoration policies that deal with the restoration, aftercare and afteruse of mineral sites and landfill sites. Table 5.1 sets out the frequency that these policies were cited in the consideration of planning applications during the monitoring period, and whether these applications were determined in accordance with those policies. The table also incorporates the plan objectives and Sustainability Appraisal (SA) objectives, the details of which can be found in Appendices 4 and 5.
- 5.2 As the table illustrates, all planning applications were determined in accordance with all the relevant development management and restoration policies. All the policy targets were therefore met during the monitoring period.
- 5.3 It should be noted that two planning applications decided in 2021, PL/0037/21 and PL/0126/20, were originally refused. PL/0126/20 was subsequently granted on appeal and is logged as 'granted in accordance with policy'. However, an appeal decision granting PL/0037/21 was subsequently quashed, so, as of December 2024, that has been logged as 'refused in accordance with policy'.
- 5.4 Accordingly, all development management and restoration policies are scored green below as per the traffic light system set out in section 3 of this report.

Table 5.1: Development management & restoration policy performance (January 2020 to December 2024)

applications determined in accordance with the policy																					

Performance:

All policies rank as green on the traffic light system (see section 3 of this AMR). That is, the policies are meeting their objectives, or at present there is no information available to indicate that this is not the case.

6. Performance of the site locations policies

6.1 For each policy of the SLD this section provides a summary box setting out:

- which plan objective(s) and Sustainability Appraisal (SA) objective(s) are linked to the policy (see appendices 4 and 5 for details of those objectives);
- the prescribed indicator(s) and target(s) from the SLD;
- the result(s) for 2020 to 2024; and
- an assessment of the performance using the traffic light system described in section 3.

Each summary box is then followed by a more detailed explanation of the results and, where necessary, an explanation of how the performance has been assessed.

Policy SL1: Mineral site allocations

Plan objective: b

SA objective: 8, 13

Indicator: Percentage of relevant planning applications determined in accordance with policy SL1.

Target: 100%

Result: 100%

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

Policy Context

SL1.1 Policy SL1 identifies sufficient sites to meet the requirements for a steady and adequate supply of sand and gravel in accordance with policy M2 of the CSDMP document.

Indicator

SL1.2 Policy SL1 was specifically cited in relation to two planning applications determined during the monitoring period, which were both granted in accordance with the policy. Further details are shown in the below extract from table M4.2. Both sites came forward in line with the anticipated timescales for delivery set out in the SLD.

Reference	Location	Description	SLD Allocation?
PL/0082/20	Land at King Street, Greatford	To extract and process sand and gravel and to progressively restore the site to a mixture of agricultural land, nature conservation area and an agricultural water reservoir	MS25-SL
PL/0087/22	Baston No.2 Quarry, Langtoft Outgang Road, Langtoft	For a south-western extension to sand and gravel workings with restoration to biodiversity and a lake	MS27-SL

SL1.3 As discussed under policies M2 and M4, seven further planning permissions were granted for sand and gravel extraction on non-allocated sites during the monitoring period. Given the relatively limited scale of extraction involved, and that they have been permitted for reasons including meeting a local shortfall in the sand and gravel landbank, and preventing unnecessary sterilisation of mineral resources, these sites are not considered to undermine the plan-led delivery of sites allocated through Policy SL1 of the SLD.

SL1.4 No issues were identified during the monitoring period regarding the deliverability of the remaining allocations in the SLD. SLD Allocation MS07/08-CL (Kettleby Quarry) was subject to a pending planning application during the monitoring period, while all of the remaining allocations are expected to be delivered later on in the plan period.

Policy SL2: Safeguarding mineral allocations

Plan objective: f

SA objective: 11

Indicator: Number of planning applications that are granted planning permission where the county council has expressed the view that the proposals would be contrary to policy SL2.

Target: Zero

Result: Zero

Performance:

Policy is meeting its objectives, or at present there is no information available to indicate that this is not the case.

Policy Context

- SL2.1 This policy safeguards the mineral sites allocated in policy SL1 of the SLD from the encroachment of incompatible development and includes a 250m buffer zone around each site. District councils are required to consult the Council on applications they receive that fall within the site specific safeguarding areas associated with the allocated mineral sites, other than for the specific exemptions set out in the policy. Where applications are caught by this policy, they should be accompanied by a Mineral Site/Infrastructure Assessment (MSIA).

Indicator

- SL2.2 During the 2020 to 2024 monitoring period, one planning application consultation was received from the district councils which was relevant to Policy SL2. However, whilst the Council responded to raise concerns, the Council did not make a formal objection regarding Policy SL2. Indeed, the concerns raised were largely around policies M11 and M12.
- SL2.3 In light of the above, no objections were raised under policy SL2 and thus no applications were approved contrary to policy.

Policy SL3: Waste site and area allocations

Plan objective: e

SA objective: 8, 9, 12

Indicator: Percentage of relevant planning applications determined in accordance with policy SL3.

Target: 100%

Result: N/A

Performance:

Some issues have been identified, with the scope and implementation of the policy

Policy Context

- SL3.1 Policy SL3 identifies waste site/area allocations to meet the county's requirements for additional waste management capacity over the plan period in accordance with policy W1 of the CSDMP document.

Indicator

- SL3.2 Whilst a significant number of waste planning applications were determined during the 2020 to 2024 monitoring period (listed in appendix 3), in the vast majority of

cases, policy SL3 was not specifically cited during determination. This is because planning officers did not deem the policy relevant for the following reasons:

- firstly, a large proportion of applications related to amendments, ancillary activities and tonnage increases at existing permitted waste facilities; and
- secondly, of the 13 applications that were made for new waste facilities, none were located within the waste site/area allocations set out in Policy SL3.

SL3.3 The applications referred to in the second point above were assessed in terms of their compliance with the spatial and locational criteria set out in policies W3 and W4 of the CSDMP, which identify site/area allocations as just one of a number of potential acceptable locations for waste facilities. All of these applications fell within acceptable locations outside the allocations.

SL3.4 The target for this policy relates specifically to planning applications made on land within the site/area allocations. As there were no such applications between 2020 and 2024, it is not possible to measure its performance against the target.

SL3.5 While no new waste facilities have been granted on site/area allocations during the monitoring period, this does not demonstrate either:

- a failure to deliver facilities required to meet the county's waste needs set out in policy W1 of the CSDMP or
- a shortfall in allocations set out in the SLD.

As demonstrated under policy W1 in this report, and in previous years' monitoring reports, additional waste capacity is predominantly being delivered through increases in tonnages at existing sites, and through new waste facilities located on other non-allocated sites considered acceptable under Policies W3 and W4. It does, however, highlight the difference in approach between, on the one hand, policies W1 and SL3 which both envisage future waste provision being met through new planning permissions being granted on land within the site/area allocations and, on the other hand, policies W3 and W4 which set out a broader range of acceptable locations.

SL3.6 It is therefore concluded that while policy SL3 ensures sufficient land has been identified in the plan to meet the county's waste needs over the plan period, to date this policy has been of limited benefit in supporting the delivery of waste facilities given the broader scope of policies W3 and W4. As a consequence the performance of policy SL3 and the associated policy W1 remain downgraded to "amber" as per the 2019 AMR.

7. Duty to co-operate

- 7.1 The duty to co-operate is integral to the Lincolnshire Minerals and Waste Local Plan. It has been embedded into the formulation of the CSDMP and SLD and will continue to form an important part of the plan monitoring process.
- 7.2 Co-operation is on-going beyond plan production. The Council continues to regularly engage with other planning authorities and relevant organisations. For example, responding to consultations and duty to co-operate requests from other authorities regarding local plans and strategic minerals and waste matters, and responding to consultations on neighbourhood plans where resources allow. Tables 7.1 and 7.2 show the consultations considered and responded to during the monitoring period.

Table 7.1: Responses to Local plan consultations in 2020 to 2024

Planning authority	Consultation issue	Date consulted
North Lincolnshire Council	North Lincolnshire Local Plan - Draft Statement of Common Ground (Minerals)	2020

Rutland County Council	Waste Movements between Lincolnshire and Rutland County Council	2023

- 7.3 As discussed under the relevant policies, the Council has also engaged in extensive consultation with district councils in relation to minerals and waste safeguarding matters. The outcome of this co-operation and engagement forms an important part of the plan monitoring process.
- 7.4 In addition to the above, the Council continues to be an active member of the East Midlands Aggregate Working Party (EMAWP). The provision of information within the annual LAA, a key component of the plan monitoring process, is dependent on data collated by the EMAWP and therefore relies directly on co-operation between its members. The EMAWP is also required to review LAAs before they are finalised by individual authorities. The Council is also a member of the East Midlands Resource Technical Advisory Body (EMRTAB) which meets less regularly than the EMAWP.

8. Conclusion

- 8.1 The entire period from 2020 to 2024 has been monitored under the adopted Lincolnshire Minerals and Waste Local Plan (LMWLP) comprising two documents: the 2016 Core Strategy and Development Management Policies (CSDMP) and the 2017 Site Locations document (SLD).
- 8.2 In respect of the provision of sand and gravel, during the monitoring period the policies in the CSDMP (supported by subsequent allocations in the SLD) delivered a sufficient supply of sand and gravel to meet demand and, as a result, the relevant policy objectives were being met. It is also considered that even if sales were to rise significantly in the near future, the LMWLP is likely to provide sufficient flexibility to accommodate increases in production.
- 8.3 For limestone aggregate production, the 2023 Local Aggregates Assessment identified that there has been a significant rise in annual sales, over and above the projected provision rate set out in the Local Plan. To reflect this higher level of demand, the method for calculating the landbank has been adjusted so that it is based upon the last 3-years average sales. Using this approach, the permitted reserves of limestone at the end of 2023 (14.037MTe) provide a landbank of 9.80 years. These reserves should therefore last beyond the plan period, which ends in 2031.
- 8.4 For the provision of waste management in the county, the need for new capacity is currently under review as part of the Waste Needs Assessment to accompany a new LMWLP as described in paragraph 8.7 below.
- 8.5 The SLD allocates almost 700ha of land, comprising one site and 16 areas that are suitable for waste uses. Approximately 170 ha of this land is currently vacant, which is a far greater area than would be required to accommodate the additional waste management facilities that will be needed (as identified in the CSDMP). It is therefore considered that the Council has not only made adequate provision for delivering the projected shortfall in waste capacity, but by allocating such large areas, has also provided significant flexibility to meet any unforeseen waste development needs over the lifetime of the plan. It should be noted, however, that a 2021 review of the LMWLP confirmed the need for a new Waste Needs Assessment to identify any emerging capacity gaps.
- 8.6 Notwithstanding the above, and issues raised in the 2021 LMWLP Review, this report has identified four policies where there are issues:
- **Policy M5: Limestone** – although the policy has been effective despite sales increasing to considerably above the plan provision, this indicates that planned provision needs to be reviewed.

- **Policy M11: Safeguarding of mineral resources** – the wide scope of this policy is considered excessive and is causing significant issues in terms of resources and delays for applicants, the district councils, and the Council and would therefore benefit from review;
- **Policy W1: Future requirements for new waste facilities and Policy SL3: Waste site and area allocations** – these policies have not been effective at delivering additional waste capacity, which instead is being delivered through the alternative criteria of policies W3 and W4 of the CSDMP.

8.7 Both parts of the LMWLP were reviewed during 2021, and that review confirmed that none of the issues highlighted above are new, as well as identifying other concerns. In light of that, although much of the existing plan is functioning effectively, work is already underway to prepare a new LMWLP to address these and other issues. Further details can be found online as follows.

Appendix 2: Minerals planning applications determined 1 January 2020 to 31 December 2024

Application Reference	Site	Description of proposal	Decision	Decision Date	Additional reserves (tonnes)
2020					
PL/0076/18	Proposed Skillington Quarry, land to the east and west of Skillington Road, Colsterworth	Application for the determination of new (updated) conditions to which a mineral site is to be subject (land subject to the Minister of Housing and Local Government decision letters dated 10 September and 21 August 1961 - reference DA9 and DA11)	G	06/07/2020	2,000,000 Limestone
PL/0167/19	Castle Quarry, Sleaford Road, Ancaster	To retain existing display walls and for the use of land for the display of stone products produced at the quarry along with limited imported products and ancillary materials (part retrospective)	G	22/01/2020	
PL/0177/19	Cemex, King Street, West Deeping, Peterborough	To vary Condition 2 of Planning Permission S81/0053/17 to allow for new method of working plans for Phases 2-4	G	04/02/2020	
PL/0001/20	Brauncewell Quarries, Brauncewell	For installation and use of aggregate washing plant and associated stockpiles and lagoons	G	20/03/2020	
PL/0017/20	Westmoor Farm, North Kelsey Road, Caistor	To vary condition 3 of planning permission 139517 for re-routing of the access road to the lodge and reshaping of lake 1	G	30/03/2020	
PL/0029/20	Copper Hill Quarry, High Dike, Ancaster	To continue the restoration of the historic section of Copper Hill Quarry utilising quarry fines arising from the current Copper Hill Quarry and to continue to operate the existing construction, demolition and excavation waste recycling facility	G	04/06/2020	
PL/0040/20	Ancaster Quarry, King Street, Heydour	For northerly and easterly quarry extension	G	06/10/2020	176,000 Limestone
PL/0060/20	Land off Mablethorpe Road, Theddlethorpe, Mablethorpe	Installation and operation of an underground gas pipeline up to 750 metres in length, connecting the existing Saltfleetby/Theddlethorpe underground gas pipeline to the National Grid National Transmission System, Theddlethorpe	G	07/08/2020	

Application Reference	Site	Description of proposal	Decision	Decision Date	Additional reserves (tonnes)
		via the Uniper gas distribution terminal, together with temporary laydown areas, parking, security and welfare facilities			
PL/0062/20	Baston No.2 Quarry, Langtoft Outgang Road, Langtoft, Market Deeping, Peterborough, PE6 9QA	To vary conditions 4 (Approved Plans), 9 (HGV Routing) and 12 (Scheme Of Working) of planning permission S11/0123/CM, to amend the approved internal haul route from Phases 3, 4 and 5 to the on-site processing plant site, which requires the construction of a bailey bridge over Gravel Drain	G	19/08/2020	
PL/0067/20	Land to the east of Smithfield Road, North Kelsey Moor, Market Rasen	To vary condition 1 of planning permission 139426 to extend the period to restore the site	G	08/09/2020	
PL/0068/20	Land to the east of Smithfield Road, North Kelsey Moor, Market Rasen	To vary condition 1 of planning permission 139434 to extend the period to restore the site	G	08/09/2020	
PL/0072/20	North Kelsey Road Quarry, Caistor	To vary condition 2 of planning permission 139819 - to continue to extract mineral reserve beyond the current expiry date of 21 July 2020	G	17/09/2020	
PL/0084/20	Great Ponton Quarry, Dallygate Lane, Great Ponton	For two mobile CCTV units (retrospective)	G	22/10/2020	
2021					
PL/0110/19	Sudbrook Quarry, Land west of Rookery Lane, Sudbrook	Application for the determination of updated conditions for planning permission WK1139 and WK4645	G	10/06/2021	1,000,000 Sand & gravel
PL/0116/20	Copper Hill Quarry, High Dike, Ancaster	To regularise the existing site infrastructure including welfare accommodation, car parking and water storage tank, for the lifetime of the quarry (retrospective)	G	08/01/2021	

Application Reference	Site	Description of proposal	Decision	Decision Date	Additional reserves (tonnes)
PL/0133/20	Fox's Land, Manor Pit Quarry, Baston Outgang Road, Baston	To vary conditions 3, 27, 28 and 29 of planning permission S13/2618/CM, to enable the site to be restored in accordance with a revised restoration plan and to allow an extension of time in which to complete restoration	G	11/03/2021	
PL/0135/20	North Meadow South, Manor Pit Quarry, Baston Outgang Road, Baston	To vary conditions 6 and 8 of planning permission S13/0046/CM to allow the site to be restored in accordance with a revised restoration scheme	G	11/03/2021	
PL/0140/20	Hollytree Farm, Croft Bank, Croft	For the change of use of land from Use Class B8 (Storage and Distribution) to ancillary uses and storage associated with the adjacent waste transfer and scrapyards facility including: storage of clean inert soil, hardcore, sand & gravel and clean steel and plant suitable for recycling; empty skips/wheelie bins; parking of the companies heavy goods vehicle/trailers and extension to the existing vehicle maintenance workshop. Works also include the culverting of water courses and erection of 3 metre high screen banking, 2.5 metre high heras fence and laying of a porous hardcore ground cover	G	18/06/2021	
PL/0014/21	Castle Quarry, Sleaford Road, Ancaster	To construct a new showroom and offices	G	04/05/2021	
PL/0037/21	Land off High Street, Biscathorpe	For a side-track drilling operation, associated testing and long-term oil production	R	07/12/2021	
PL/0054/21	Ropsley Quarry, Long Hollow Lane, Ropsley	To vary condition 25 of planning permission S12/0158/CM to extract using modern blasting techniques	G	11/06/2021	
PL/0057/21	Leadenham Landfill, Pottergate Road, Leadenham	To vary condition 2 (Approved Details and Plans) and condition 21 (Restoration Scheme) of planning permission N/0947/92	G	27/07/2021	
PL/0058/21	Leadenham Landfill, Pottergate Road, Leadenham	To vary condition 2 (Approved Details and Plans) and condition 21 (Restoration Scheme) of planning permission N/0575/93	G	27/07/2021	

Application Reference	Site	Description of proposal	Decision	Decision Date	Additional reserves (tonnes)
PL/0059/21	Leadenham Landfill, Pottergate Road, Leadenham	To vary condition 1 (Restoration Scheme) of planning permission N/0778/93	G	27/07/2021	
PL/0073/21	Saltfleetby B Well site, Howdales, South Cockerington	For a sidetrack drilling operation from an existing borehole at Saltfleetby B well site to enable a lateral borehole to be drilled up to 1500m to the south west	G	29/07/2021	
PL/0105/21	Embryo Angling Habitats, Swinderby Road/Butt Lane, Norton Disney	To retain and regularise leisure facilities at Embryo angling habitats including installation of main entrance gate, otter fence gate, lodge and welfare facilities, toilet block and composting toilet	G	07/12/2021	
PL/0130/21	Swinderby Quarry, Camp Road, Witham St Hughs	For use of land as ancillary to mineral working, for part of lagoon and conveyor (part retrospective)	G	11/11/2021	
2022					
PL/0082/20	Land at King Street, Greatford	To extract and process sand and gravel and to progressively restore the site to a mixture of agricultural land, nature conservation area and an agricultural water reservoir	G	07/07/2022	3,000,000 Sand & gravel
PL/0084/21	Swinderby Quarry, Camp Road, Witham St Hughs	To vary conditions 2, 5, 14 and 40 of planning permission 19/0439/CCC - to allow the use of conveyors to transport mineral on site, and minor changes to phasing amendments	G	18/02/2022	
PL/0118/21	Little Ponton Quarry, Whalebone Lane, Little Ponton	Retrospective planning application to regularise revisions to the site infrastructure, including additional office and welfare accommodation, site laboratories and storage, and the provision of additional car parking	G	12/01/2022	
PL/0143/21	Welton Quarry, Bluestone Heath Road, Welton le Marsh	For the extension of existing offices to provide new archive storage and administrative offices associated with the existing quarry	G	14/01/2022	
PL/0144/21	Little Ponton Quarry, Whalebone Lane, Little Ponton	For the construction and operation of a concrete block manufacturing facility	G	10/01/2022	

Application Reference	Site	Description of proposal	Decision	Decision Date	Additional reserves (tonnes)
PL/0167/21	Land to the east of Smithfield Road, North Kelsey Moor	To vary conditions 1 (expiry date) and 3 (approved documents and drawings) of planning permission 141306	R	11/04/2022	
PL/0168/21	Land to the east of Smithfield Road, North Kelsey Moor	To vary conditions 1 (development cease date) and 2 (approved documents and drawings) of planning permission 141307	R	11/04/2022	
PL/0176/21	Saltfleetby B Well site, Howdales, South Cockerington	To vary condition 1 of prior approval PL/0052/20, to reconfigure part of the approved layout	G	16/03/2022	
PL/0019/22	Ropsley Quarry, Long Hollow Lane, Ropsley	To vary conditions 2, 3, 6, 7, 8, 26 and 27 of Planning Permission S21/0804, to extract the northern area of the quarry	G	10/05/2022	
PL/0023/22	South Thoresby Quarry, Greenfield Lane, South Thoresby	To vary conditions 7 (sheeting) and 8 (dust management) of planning permission (E)S163/2206/02	R	11/04/2022	
PL/0024/22	South Thoresby Quarry, Greenfield Lane, South Thoresby	To vary conditions 5 (dust management) and 10 (sheeting) of planning permission (E)S163/1599/02	R	11/04/2022	
PL/0026/22	Land south of West Deeping Quarry, King Street, West Deeping	For the proposed southern extension to existing sand and gravel extraction operations with restoration to low level agriculture and amenity/nature conservation	G	06/07/2022	150,000 Sand & gravel
PL/0037/22	Manor Pit, Baston Outgang Road, Baston	For the extraction of sand and gravel beneath former plant site with enhanced restoration to amenity/nature conservation	G	06/07/2022	175,000 Sand & gravel
PL/0052/22	Fiskerton Airfield Well site, Fiskerton	For the installation of groundwater monitoring boreholes	G	11/07/2022	
PL/0078/22	Whisby A Well site, Eagle Moor, Lincoln	For the drilling of a side-track to an existing oil producing well	G	13/10/2022	

Application Reference	Site	Description of proposal	Decision	Decision Date	Additional reserves (tonnes)
PL/0081/22	West Deeping Quarry, King Street, West Deeping	To regularise the installation of a new wheel wash (retrospective)	G	13/09/2022	
PL/0086/22	Welton Gathering Centre, Sudbrooke	For the construction and use of battery storage facilities on land at and in support of the operations at the Welton Gathering Centre	G	14/10/2022	
2023					
PL/0132/21	Bede Farm, Cross Keys Lane, Coningsby	For the enlargement of an existing irrigation pond and the removal from site of extracted minerals (sand and gravel) for treatment	G	13/09/2023	6,300 Sand & gravel
PL/0129/22	West Deeping Quarry, King Street, West Deeping	To vary condition 2 of planning permission S19/0497 to amend the mineral extraction boundary and reduce the standoff distances from Rectory Farm, Crown Farm and The Lodge	G	07/11/2023	200,000 Sand & gravel
PL/0130/22	West Deeping Quarry, King Street, West Deeping	To vary condition 3 of planning permission S19/0486 - to amend the mineral extraction boundary and reduce the standoff distance from Crown Farm	G	07/11/2023	See PL/0129/22
PL/0131/22	Welton Quarry, Bluestone Heath Road, Welton Le Marsh	To retain a steel palisade security fence	G	13/02/2023	
PL/0021/23	Manor Pit, Baston Outgang Road, Baston	For extraction of sand and gravel beneath former Readymix plant site with enhanced restoration to amenity/nature conservation	G	09/08/2023	30,000 Sand & gravel
PL/0024/23	Manor Pit, Baston Outgang Road, Baston	To vary conditions 4, 26 and 27 of planning permission S22/0758 to revise the approved restoration scheme	G	09/08/2023	
PL/0055/23	Swinderby Quarry, Camp Road, Witham St Hughs	To install a solar PV array development and associated infrastructure to generate electricity for the operation of Swinderby Quarry plant machinery and site offices	G	13/11/2023	

Application Reference	Site	Description of proposal	Decision	Decision Date	Additional reserves (tonnes)
PL/0063/23	Colsterworth Triangle, Crabtree Road, Colsterworth	To vary condition 6 and remove condition 20 of planning permission S15/3028 to remove stone under area occupied by weighbridge and wheelwash	G	08/12/2023	
PL/0064/23	Mansgate Chalk Quarry, Mansgate Hill, Nettleton	For retention of a bund	G	27/11/2023	
2024					
PL/0087/22	Baston No. 2 Quarry, Langtoft Outgang Road, Langtoft	For a south-western extension to sand and gravel workings with restoration to biodiversity and a fishing lake	G	19/08/2024	1,000,000 Sand & gravel
PL/0088/22	Baston No. 2 Quarry, Langtoft Outgang Road, Langtoft	For the retention of the Baston No. 2 Baston Processing Plant Site, internal haul roads and ancillary operations including weighbridge, office, wheel wash and established quarry access and restoration to biodiversity	G	19/08/2024	250,000 Sand & gravel
PL/0135/22	Land to the west of Northlands Road, Glentworth	To construct a hydrocarbon wellsite, with the drilling of one vertical appraisal well and up to seven horizontal development wells and ancillary development	G	09/02/2024	
PL/0011/23	Great Ponton Quarry, Dallygate Lane, Great Ponton	For an 8.6 hectare northern extension to the existing limestone quarry	G	26/07/2024	980,000 Limestone
PL/0056/23	South Witham Quarry, Mill Lane, South Witham	To vary condition 5 of planning permission S19/0636 (reference S17/0563) to allow tipper trucks (HGVs) parked overnight on the site to leave South Witham Quarry between the hours of 06:00 and 07:00	G	17/04/2024	
PL/0083/23	CEMEX West Deeping Quarry, King Street, West Deeping	For a 1.97 ha south-eastern extension to the existing sand and gravel extraction operations with restoration to amenity/nature conservation	G	13/02/2024	80,000 Sand & gravel
PL/0094/23	Land south of Dunston Quarry, Lincoln Road, Dunston	For a southern extension to Dunston Quarry	G	16/05/2024	825,000 Limestone

Application Reference	Site	Description of proposal	Decision	Decision Date	Additional reserves (tonnes)
PL/0098/23	Dunston Quarry, Lincoln Road, Dunston	To vary conditions 1, 2, 24, 29, 31 and 34 of planning permission N26/0523/09	G	16/05/2024	
PL/0099/23	Dunston Quarry, Lincoln Road, Dunston	To vary conditions 2, 4, 6, 7 and 19 of planning permission N26/0437/17 (appeal reference APP/Q2500/W/17/3190663)	G	16/05/2024	
PL/0100/23	Dunston Quarry, Lincoln Road, Dunston	To vary conditions 1 and 10 of planning permission N26/0434/16	G	16/05/2024	
PL/0101/23	Dunston Quarry, Lincoln Road, Dunston	To vary condition 5 of planning permission 22/0480/CCC	G	16/05/2024	
PL/0019/24	Woodhall Spa Concrete Plant, Kirkby Lane, Kirkby on Bain	For retrospective approval for two concrete silos on site at Woodhall Spa Concrete Plant	G	04/07/2024	
PL/0046/24	Great Ponton Quarry, Dallygate Lane, Great Ponton	To vary condition 2 of planning permission S19/1823 - to permit importation of overburden material from adjacent extension area into existing quarry	G	26/07/2024	
PL/0073/24	Creeton Quarry, Nut Hollow, Couthorpe	To vary condition 18 of planning permission S18/0719 to allow a period of 24 months from the date when the mining operations have permanently ceased for the removal of all buildings, plant, machinery, structures and for the restoration of the land	G	08/11/2024	
PL/0081/24	Land northwest of Highfield Quarry, Bluestone Heath Road, Welton le Marsh	To extend the quarry into agricultural land lying immediately to the northwest of the existing quarry	G	04/12/2024	950,000 Chalk

(G = Planning application granted, R = Planning application refused)

Appendix 3: Waste planning applications determined 1 January 2020 to 31 December 2024

Figures stated for annual tonnage are indicative and subject to review alongside the WNA work for the new LMWLP

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
2020					
PL/0064/20	Lincolnshire County Council's Waste Transfer Station, Slippery Gowt Lane, Wyberton	For installation of new external fire pumphouse and water storage tank to facilitate the installation of a fire suppression system within the existing waste transfer facility	G	15/09/2020	N/A
PL/0081/20	Grantham Waste Transfer Station, Occupation Road, Great Gonerby	To vary condition 2 and 7 of planning permission ref: S37/1976/16 – To reflect proposed amendments to the site landscape planting scheme	G	05/11/2020	N/A
PL/0119/19	Dembleby Farm, Ropsley, Grantham, NG34 0EQ	To retain a tank for the storage of liquid organic waste	R	03/03/2020	N/A
PL/0122/19	Somerby Low Farm, Somerby, Barnetby, DN38 6EY	To retain a tank for the storage of liquid organic waste	R	03/03/2020	N/A
PL/0121/19	Land off A1084, Kettleby, Brigg, DN20 9HH	To retain a tank for the storage of liquid organic waste	R	03/03/2020	N/A
PL/0145/19	Decoy Farm, Spalding Road, Crowland, Peterborough, PE6 0LX	To vary condition 2(b) of planning permission H2/1057/15	G	07/01/2020	N/A
PL/0151/19	Blue Sky Plastic Recycling, South Fen Road, Bourne, PE10 0DN	To vary condition 8 of planning permission S18/0643 - to extend the operating hours to 07:00 to 23:00 hours Mondays to Sundays	G	12/03/2020	N/A
PL/0158/19	PMK Recycling, Recycling Plant, Baston Outgang Road, Baston	To construct open sided canopy extension to west elevation of the existing building	G	02/01/2020	N/A

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0160/19	Clarkeson Recycling Ltd, Riby Road, Riby	To continue the use of land for skip hire business within the existing waste transfer station and recycling site	G	09/01/2020	N/A
PL/0170/19	Elliot House, Ark Road, North Somercotes, LN11 7NU	To Vary Condition 3 of Planning Permission N/1322/1383/16 to extend working hours	G	13/01/2020	7,000 (waste oil)
PL/0178/19	Lindum Waste Recycling, Saxilby Enterprise Park, Saxilby, Lincoln, LN1 2LR	To construct a new single storey welfare building replacing existing modular facilities	G	20/02/2020	N/A
PL/0182/19	Park Farm, Gainsborough Road, Willingham by Stow, Gainsborough, DN21 5JX	To construct a liquid organic waste storage tank	G	14/02/2020	25,000 (liquid organic)
PL/0186/19	Lindum Waste Recovery, Saxilby Enterprise Park, Skellingthorpe Road, Saxilby, Lincoln, LN1 2LR	Extension to an existing canopy to accommodate additional equipment to improve recycling process	G	03/03/2020	N/A
PL/0190/19	Swinderby Quarry, Camp Road, Witham St Hughs, Lincoln, LN6 9TW	To retain the relocated recycling operation for a period of three years	G	12/03/2020	N/A
PL/0009/20	New Earth Solutions (West) Ltd, Land off Honey Pot Lane, North Witham	For the proposed alterations and extension of windrow composting facility including formation of hardstanding, landscaped bunding and drainage system to allow processing of 45,000 tonnes of organic material per annum	G	05/06/2020	45,000 (organic material)

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0010/20	Clarkeson Recycling Ltd, Riby Road, Riby	To vary condition 2 (increase of tonnage from 25,000 to 50,000 per annum), condition 3 (change from green waste to wood/green/biodegradable waste, paper, cardboard, construction, demolition, excavation, gypsum, road sweepings and general waste contained in mixed load skips) and condition 9 (vary hours of operation) of planning permission 129802	G	24/03/2020	25,000 (various)
PL/0014/20	Four Acre Farm, South Fen Road, Bourne	For an extension to existing waste transfer building	G	30/04/2020	N/A
PL/0019/20	T & B Containers, 12-16 Redstone Road, Boston	For retrospective planning permission to continue the use of land and buildings as a waste transfer station (recycling of cardboard and plastic packaging)	G	05/06/2020	11,280 (recycling of cardboard and plastic packaging)
PL/0031/20	CleanTech UK Limited, Hemswell Business Park, Hemswell Cliff	To retain an external storage area and new processing bridge	G	03/06/2020	N/A
PL/0041/20	Land off Nocton Fen Lane, Nocton	For the construction of a covered digestate storage lagoon, perimeter bunding and fencing	G	07/07/2020	N/A
PL/0044/20	Household Waste Recycling Centre, Slippery Gowt Lane, Wyberton	For retrospective change of use from a household waste recycling centre and materials recovery facility to an inert materials processing facility for a temporary period of 15 years	G	17/07/2020	75,000 (inerts)
PL/0046/20	New Earth Solutions (West) Ltd, Copper Hill Industrial Estate, Ermine Street, Barkston Heath, Ancaster, Grantham	For an extension to Shed 1B (and 1A) to form covered storage area for SRF (Solid Replacement Fuel) material	G	30/07/2020	N/A

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0047/20	New Earth Solutions (West) Ltd, Copper Hill Industrial Estate, Ermine Street, Barkston Heath, Ancaster, Grantham, NG32 3FH	For installation of liquid natural gas storage tank with ancillary ambient vaporisers, hardstanding, security fencing and landscaped earth bunding	G	03/09/2020	N/A
PL/0056/20	New Earth Solutions (West) Ltd, Copper Hill Industrial Estate, Ermine Street, Barkston Heath	For proposed reinstatement of building 3b, replacement of building 4 and erection of building (4b) including installation of internal fixed plant to accommodate materials recovery operation	G	04/08/2020	150,000 (MRF)
PL/0057/20	Land At South Fen Road, Bourne	For the proposed use of land for waste recycling to produce soil, soil substitutes and aggregate and siting of two modular office / welfare units	R	08/09/2020	N/A
PL/0061/20	1 - 3 Ashtree Lane, off Stumps Lane, Spalding	For change of use (part retrospective) to retain a materials recovery facility	G	30/09/2020	3,000 (recycling of cardboard and plastic packaging)
PL/0073/20	Hollytree Farm, Croft Bank, Croft	For the retention of a recycling plant, installation of a 300 cubic metre emergency waste water storage tank, formation of a screen bund, and culvert of a Lindsey Marsh drainage board maintained drain	G	22/10/2020	N/A
PL/0075/20	AEL Biogas, East Kirkby, Spilsby	To vary conditions 6 and 10 of planning permission S/046/00988/16 so as to allow solid digestate to be used as a silage cover and to increase the height of the silage clamp storage from 4 metres to 6 metres	G	01/10/2020	N/A

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0087/20	Four Acre Farm, South Fen Road, Bourne	For the use of land adjacent to existing waste management facility for staff/visitor parking, empty skip/container and daytime HGV storage with the erection of new access gates, fencing and associated landscaping (partly in retrospect).	R	03/11/2020	N/A
PL/0096/20	New Earth Solutions (West) Ltd, Copper Hill Industrial Estate, Ermine Street, Barkston Heath	For installation of modular staff amenity and training building	G	21/12/2020	N/A
PL/0100/20	The Dock, Boston	For the change of use from waste electrical and electronic equipment (WEEE) storage to general port storage and incinerator ash bagging	G	10/12/2020	N/A
PL/0107/20	Clarkeson Recycling Limited, Riby Road, Riby	To remove existing temporary maintenance building/scaffold structure and erect a new permanent enclosed and secure maintenance building	G	18/11/2020	N/A
PL/0115/20	Highfield Quarry, Bluestone Heath Road, Welton Le Marsh	To vary condition 5 of planning permission N/199/01519/14 to allow the replacement of the filter press with a centrifuge (retrospective)	G	30/11/2020	N/A
PL/0118/20	Leadenhall Farm, Holbeach	For construction of a covered digestate storage lagoon, perimeter bunding and fencing	G	11/12/2020	N/A
2021					
PL/0093/20	Land adjacent to the A57, Kettlethorpe	To construct two organic manure lagoons and associated banks and roadways	G	18/01/2021	N/A
PL/0095/20	Gainsborough Landfill, Lea Road, Gainsborough	For regularisation of a third leachate storage tank, re-location of an associated compressor container; restoration soils storage area including a plant compound	G	18/02/2021	N/A

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0111/20	The Old Pig Farm, Honey Pot Lane, Colsterworth	For the erection of plant and ancillary development, including some stockpiling, to facilitate the importation and processing of reject and used asphalt to produce recycled asphalt	G	19/01/2021	50,000 (asphalt recycling)
PL/0114/20	New Earth Solutions (West) Ltd, Copper Hill Industrial Estate, Ermine Street, Barkston Heath, Ancaster	For proposed extension and change of use of building 11 to accommodate waste plastic recovery and pelletising plant operation	G	14/01/2021	N/A
PL/0117/20	Land off Thompson's Lane, Fosdyke, Boston	For a proposed windrow composting site	G	18/01/2021	10,000 (composting)
PL/0119/20	Lindum Waste Recovery, Saxilby Enterprise Park, Skellingthorpe Road, Saxilby	To vary condition 3 of Planning Permission 140346 (to retain building)	G	03/02/2021	N/A
PL/0120/20	Slippery Gowt Farm, Boston Borough Landfill Site, Slippery Gowt Lane, Wyberton	To vary condition 5 of planning permission B/00/0139 - to extend working hours	G	28/01/2021	N/A
PL/0125/20	Manor Farm, Ferry Lane, Skellingthorpe	For an earth embanked waste water lagoon	G	03/03/2021	N/A
PL/0126/20	Reed Point, Spalding Road, Sutterton	To remove condition 6 of Planning Permission B/16/0217 - to allow outside storage when the site is not in operation	R	17/03/2021	N/A
PL/0132/20	Hook Cliff Farm, Newark Hill, Great Gonerby	For green waste storage and processing for cattle bedding for use on farm holding; separation of logs from green waste stream for storage and splitting for onward sale to domestic customers	G	29/04/2021	N/A

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0134/20	1-3 Ashtree Lane, off Stumps Lane, Spalding	To vary condition 5 (stockpiles) and to remove condition 7 (storage) of planning permission H16-0546-20	G	10/02/2021	N/A
PL/0142/20	Silver Skips Lincolnshire Ltd, Nursery Road, Riverside Industrial Estate, Boston	To vary conditions 1, 2, 4, 6, 8 and 10 of planning permission B/15/0195 to allow for the formation of a concrete area and changes to the arrangements in the yard	G	30/03/2021	N/A
PL/0144/20	Harmston Quarry, Tower Lane, Harmston	To vary condition 3 of planning permission 18/1499/CCC - to allow a further year for the recycling of inert waste	G	08/03/2021	N/A
PL/0145/20	Harmston Quarry, Tower Lane, Harmston	To vary condition 3 of planning permission 18/1503/CCC - to allow a further year for the recycling of inert waste	G	08/03/2021	N/A
PL/0004/21	New Mills, North Witham Road, South Witham	For change of use of building from storage and distribution (Use Class B8) to waste plastics/polymer/PVC/rubber recycling facility (Sui Generis use)	G	17/03/2021	600 (recycling)
PL/0015/21	Leadenham Landfill, Pottergate Road, Leadenham	For the construction of a new building for a waste mattress shredding and flocking facility	G	05/08/2021	N/A
PL/0027/21	North Hykeham Landfill Site, Whisby Road, North Hykeham	For the installation of a wheel wash to remove debris / dirt from vehicles prior to them joining the highways	G	09/09/2021	N/A
PL/0028/21	Middlemarsh Landfill Site, Middlemarsh Road, Burgh Le Marsh	To vary conditions 2 (Final post-restoration contours) and condition 4 (Planting and Landscaping) of planning permission (E)S23/2184/10	G	26/04/2021	N/A

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0034/21	New Earth Solutions (West) Ltd, Copper Hill Industrial Estate, Ermine Street, Barkston Heath	For the formation of Solid Recovered Fuel (SRF) bale storage areas	G	13/05/2021	N/A
PL/0035/21	New Earth Solutions (West) Ltd, Copper Hill Industrial Estate, Ermine Street, Barkston Heath	To vary Condition 4 of planning permission N74/1580/16 - To increase the height of externally stacked bales of Solid Recovered Fuel (SRF) from 4 metres to 4.5 metres	G	26/04/2021	N/A
PL/0041/21	Stainby Quarry, Crabtree Road, Stainby	To operate an inert waste recycling facility to recover and recycle hardcore, stone, tarmac and concrete from construction, demolition and excavation waste (C, D & E) utilising a mobile crushing and screening plant	G	11/05/2021	50,000 (inerts recycling)
PL/0051/21	Former Landfill Site, Kirkby Lane, Tattershall Thorpe	To construct a Household Waste Recycling Centre (HWRC) with a single storey welfare building/office, canopies, improved site access/entrance and surface water attenuation pond	G	29/07/2021	N/A
PL/0075/21	Anson Farms, Eagle Road, Swinderby	For an open fronted shed to mature green waste compost	G	11/08/2021	N/A
PL/0074/21	Tollemach Road South, Grantham	For the construction of a Waste Transfer Station, including ancillary single storey office building, associated weighbridge, vehicle fuel station, vehicle wash bay, sprinkler tanks and pumphouse, together with associated access, landscaping, service areas, parking and retaining wall structures	G	20/08/2021	40,000 (transfer of mixed recyclables)
PL/0077/21	Glebe Farm, Recycling Solutions Ltd, Little Grimsby Lane, Fotherby	To install and operate oil-fired drying kiln and associated oil storage vessel with bunding	G	15/10/2021	N/A

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0080/21	Land at Gonerby Moor, Old Great North Road, Great Gonerby	For change of use of land to skip hire operation (waste transfer station) including erection of covered store, portable office building and weigh bridge	G	09/09/2021	5,000 (transfer)
PL/0081/21	The Grange, Caistor Road, Swallow	For the Installation of two green slurry tanks with membrane tension covers, including concrete bases and demolition of existing silage clamp	G	27/09/2021	N/A
PL/0087/21	New Earth Solutions (West) Ltd, Copper Hill Industrial Estate, Ermine Street, Barkston Heath	For retention of fire suppression system water storage tank and containerised pump/switch gear unit upon land adjoining building 3B	G	13/09/2021	N/A
PL/0091/21	Laurel Lodge Farm, Hurn Road, Holbeach Hurn	To change the use of existing buildings to a plastics processing facility and to construct three additional buildings	G	03/11/2021	36,000 (plastics)
PL/0097/21	Former car auction site off Cherry Holt Road, Bourne	For the continued use of land for empty skip storage, HGV and car parking and permission for the construction of a storage bay and use for the storage of construction materials	G	04/11/2021	N/A
PL/0098/21	BSH Hire Recycling Centre, Cherry Holt Road, Bourne	For extension to trommel building and erection of replacement baling shed with ancillary works	G	03/11/2021	N/A
PL/0100/21	CleanTech UK Limited, Hemswell Business Park, Hemswell	For additional external storage areas for finished product in bags at 2m high	G	20/10/2021	N/A
PL/0108/21	Manor Farm, 7 Lower Church Road, Skellingthorpe	To construct a waste water tank to store washing water from local abattoir for use as fertiliser on the farm	G	19/11/2021	N/A

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0120/21	Leadenham Landfill, Pottergate Road, Leadenham	To remove condition 5 of planning permission 21/0799/CCC to allow external storage for a maximum period of 24 hours	G	30/11/2021	N/A
2022					
PL/0056/22	Boston Waste Transfer Station, Slippery Gowt Lane, Wyberton	To vary condition 2 (approved documents and plans) of planning permission B/20/0206 - to ensure the development is carried out in accordance with an alternative fire suppression system	G	14/07/2022	N/A
PL/0033/20	Jerusalem Farm, Jerusalem Road, Skellingthorpe	For the demolition of the existing animal by-products processing plant and all associated installations and the construction of a new animal by-products processing plant, comprised of: raw material reception and processing buildings; engineers building; boiler house; oxidiser building and flue; DAF plant; effluent treatment plant; bio filter bed; general office; weighbridge and weighbridge office; hardstanding areas for accessing the processing plant and for parking of cars, commercial vehicles and trailers used in connection with the operation; alterations to the existing site access from Jerusalem Road; and all associated development, including landscaping	G	14/02/2022	N/A
PL/0079/21	Boston Landfill, Slippery Gowt Lane, Wyberton	For the installation of ground mounted solar PV array and associated infrastructure	G	21/01/2022	N/A
PL/0102/21	Westville Farm Yard, Northlands Road, Westville	For retrospective permission for the installation of a recycling system containing a magnet, trommel, blower and picking lines	G	06/01/2022	N/A

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0148/21	New Earth Solutions (West) Ltd, Copper Hill Industrial Estate, Ermine Street, Barkston Heath	For the formation of two SRF/recovered plastics bale storage areas	G	26/01/2022	N/A
PL/0149/21	Waste Recycling Centre, Sewage Works, Navigation Lane, Caistor	For the installation of five operational kiosks and a new wash water pumping station	G	14/02/2022	N/A
PL/0153/21	Lindum Waste Recovery, Saxilby Enterprise Park, Skellingthorpe Road, Saxilby	For the installation of a freestanding canopy/cover structure for stored materials	G	15/02/2022	N/A
PL/0156/21	New Earth Solutions (West) Ltd, Copper Hill Industrial Estate, Ermine Street, Barkston Heath	For the formation of forced aeration reed bed surface water treatment and drainage system	G	02/03/2022	N/A
PL/0166/21	BSH Hire Recycling Centre, Cherry Holt Road, Bourne	For a replacement boundary barrier	G	17/03/2022	N/A
PL/0012/22	Autby House, Autby Drive, North Thoresby	For the demolition of dilapidated single storey buildings, construction of new extension to accommodate processing machinery	G	16/05/2022	N/A
PL/0014/22	Mayflower House, Mayflower Renewable Fuels, Marsh Lane, Boston	For the continued use of land and buildings for the importation, storage and processing of waste wood to produce dry wood chip/biomass product along with the retention of two biomass boilers	G	18/07/2022	N/A
PL/0028/22	Dunston Quarry, Lincoln Road, Dunston	For the installation and operation of a wash plant in conjunction with the existing recycling facilities	G	13/05/2022	N/A

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0033/22	Cemex West Deeping Quarry, King Street, West Deeping	To vary conditions 2 and 4 of planning permission S19/2127 to allow for an amended phasing programme and revisions to the approved restoration scheme	G	06/07/2022	N/A
PL/0035/22	V.W. Breakers UK Ltd, The Old Smithy, Highgate, Leverton	For change of use from Use Class B1/haulage depot to end of life vehicles (ELV) dismantling facility	R	26/07/2022	N/A
PL/0044/22	Cemex, West Deeping Quarry, King Street, West Deeping	For a temporary change of use / extended use of part of the existing CEMEX West Deeping Quarry to allow for the importation of mineral to the site for processing	G	06/07/2022	N/A
PL/0045/22	Dunston Quarry, Lincoln Road, Dunston	For installation of a replacement weighbridge (retrospective)	G	13/05/2022	N/A
PL/0048/22	Mushroom Farm, 10 Boundary Lane, South Hykeham	For construction and use of a waste screen	G	07/09/2022	N/A
PL/0049/22	Land off Barff Lane, Glentham	To construct an on-farm anaerobic digestion plant, associated infrastructure, lagoons and feedstock clamps	G	05/09/2022	2,600 (potato peelings)
PL/0051/22	Boston Landfill Site, Slippery Gowt Lane, Wyberton	To vary conditions 2, 4 and 8 and to remove condition 7 of planning permission B22/0392/95 so that the finished levels, including all capping and soil forming material, reflect the current and final position on the site; to amend the landscaping proposals, and to update the surface water management scheme	G	30/09/2022	N/A
PL/0059/22	Environcom Ltd, Great North Road, Grantham	For the installation of a Thermal Treatment Waste to Energy (TTWE) plant to serve the existing electrical waste and electronic equipment recycling and reuse facility	G	21/07/2022	260 (refrigerant gases)

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0061/22	Colsterworth Landfill Site, Woolsthorpe Road, Colsterworth	To retain a leachate storage tank	G	29/06/2022	N/A
PL/0062/22	Kenwick Quarry Waste Disposal Site, London Road, Tathwell	To allow further engineering operations to complete infilling and restoration (part retrospective application)	G	24/08/2022	N/A
PL/0071/22	Boston Biomass UK No 3 Ltd, Nursery Road, Riverside Industrial Estate, Boston	For the retention of Over Fire Gas Recirculation (OFGR) fan, associated ducting system, odour control system to the fuel feed store and additional stores warehouse next to the fuel feed store	G	03/11/2022	N/A
PL/0082/22	Brauncewell Quarries Limited, Long Lane, Brauncewell	For the installation and operation of filter press	G	22/09/2022	N/A
PL/0090/22	Lindum Waste Recovery, Saxilby Enterprise Park, Skellingthorpe Road, Saxilby	To construct a new framed building for the storage of soil	G	08/11/2022	N/A
PL/0101/22	Leadenham Landfill, Pottergate Road, Leadenham	For 1 x 100 cubic metre leachate storage tank and a compressor shed (retrospective)	G	16/11/2022	N/A
PL/0102/22	Swinderby Quarry, Camp Road, Witham St Hughs	To vary condition 9 of planning permission 20/0026/CCC to retain the operation in the same location for a further three-year period	G	09/11/2022	N/A
PL/0110/22	Four Acre Farm, South Fen Road, Bourne	For an extension to the existing waste transfer building	G	05/12/2022	N/A

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0112/22	JJ Mac Farming Ltd, Spalding Road, Bourne	For the change of use of land to a construction, demolition and excavation waste recovery facility; storage of aggregates, plant and vehicles; construction of a site office and car park; erection of 2.4m high Legio block wall and six concrete bays; and the installation of a sewage treatment plant (partially retrospective)	G	21/12/2022	70,000 (C, D & E)
2023					
PL/0117/22	Autby House, Autby Drive, North Thoresby	To vary conditions 12 and 13 of planning permission N/133/2529/16 - to cover all of the processes on the site	G	23/01/2023	N/A
PL/0119/22	The Old Ship Inn, Beck Bank, Gosberton Clough, Spalding	For change of use of redundant courier/transportation business to car dismantling business	G	13/02/2023	N/A
PL/0122/22	Gainsborough Landfill Site, Lea Road, Gainsborough	For a small methane stripping plant and a 40ft storage and workshop container	G	02/02/2023	N/A
PL/0123/22	New Earth Solutions (West) Ltd, Copper Hill Industrial Estate, High Dike, Wilsford	For the installation of free standing and roof mounted PV Panels and siting of containerised battery storage units	G	31/01/2023	N/A
PL/0126/22	Colsterworth Triangle, Crabtree Road, Colsterworth	For relocation within site of existing weighbridge, wheel-wash and portable building	G	08/12/2023	N/A
PL/0137/22	New Earth Solutions (West) Ltd, Caythorpe Heath Lane, Caythorpe	For the installation of new internal plant, replacement external cladding and external doors, roof mounted photovoltaic panels and the retention of lean-to extension to accommodate materials recovery facility and variation of operating hours within Buildings 9 & 10	G	18/04/2023	N/A

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0144/22	Woodbecks Farm, Edlington Road, Edlington	To vary condition 11 of planning permission S/049/01560/19 to allow construction traffic and HCV tankers to access the site via Hungram Lane rather than Edlington Road	G	14/03/2023	N/A
PL/0009/23	Intervention Store, Control Tower Adjacent to Learoyd Road, Hemswell Cliff	To remove condition 3 of planning permission 139265 - to remove restrictions on operating hours	G	15/05/2023	N/A
PL/0010/23	Hemswell Biogas AD Plant, Hemswell Cliff Industrial Estate, Hemswell Cliff	To remove condition 4 of planning permission 139884 - to remove the restrictions on operating hours	G	15/05/2023	N/A
PL/0013/23	V.W. Breakers UK Ltd, The Old Smithy, Highgate, Leverton	For change of use from Use Class B1/haulage depot to end of life vehicles (ELV) dismantling facility	R	10/05/2023	N/A
PL/0015/23	Station Farm, Station Road, Sibsey	For an extension to anaerobic digestion plant for biomethane production and construction of cold store	G	13/06/2023	N/A
PL/0016/23	Land east of A1 Gonerby Moor	To vary condition 2 (approved plans and documents), condition 4 (feedstock tonnage), condition 10 (landscaping) and condition 16 (gas exports) of planning permission S18/2119	G	08/06/2023	25,000 (AD)
PL/0026/23	Hollytree Farm, Croft Bank, Croft	For the retention of a fire fighting facility	G	25/08/2023	N/A
PL/0041/23	Land off Barff Lane, Glenthams	To vary condition 2 and to remove condition 4 of planning permission 144778 to amend the approved anaerobic plant layout	G	08/12/2023	N/A

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0043/23	Fern Cottage, Ings Lane, Bratoft	For the use of land and buildings as an aggregate recycling facility including the installation and operation of a wash plant; excavation of ancillary freshwater and settlement lagoons/lakes; construction of internal roads, concrete apron for the storage of materials and boundary landscape bund, wheel wash and site office	R	07/11/2023	N/A
PL/0044/23	Land off Barff Lane, Glentham	For a landscaped earth bund, installation of National Grid connection plant, creation of hardstanding for storage of straw bales (all in connection with approved anaerobic digestion plant)	G	06/12/2023	N/A
PL/0052/23	Park Farm, Gainsborough Road, Willingham by Stow	For the construction of an additional liquid fertiliser storage tank	G	18/10/2023	N/A
PL/0058/23	Canwick Sewage Treatment Works, Washingborough Road, Lincoln	To install a ground mounted solar array and associated infrastructure on land adjacent to Canwick Water Recycling Centre	G	15/11/2023	N/A
PL/0075/23	The Old Ship Inn, Beck Bank, Gosberton Clough, Spalding	For change of use of redundant courier/transportation business to car dismantling business	G	07/12/2023	N/A
2024					
PL/0100/22	Land to the west of Hemswell Biogas Ltd, Hemswell Cliff Industrial Estate, Hemswell Cliff	To construct a 6MW anaerobic digestion plant with associated waste reception building, vehicular fuelling station, three digesters, gas bag and new access road	G	04/06/2024	200,000 (AD)
PL/0069/23	Gainsborough Skip Hire, Laughton Lane, Morton	For change of use of agricultural land to be used for the storage and process of inert materials as part of an existing waste transfer station	G	12/02/2024	N/A

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0095/23	Mushroom Farm, Boundary Lane, South Hykeham	To construct a general purpose building (on site and on footprint of previously approved general purpose store building - application references: PL/0025/18 & 18/1096/CCC) and general purpose/related external storage of materials, aggregates, skips and equipment in connection with the applicant's use of the adjacent site as an MRF	G	14/03/2024	N/A
PL/0090/23	Land at Whisby Landfill Site, Eagle Road, Whisby	For the processing of Incinerator Bottom Ash (IBA) and subsequent landfilling of IBA into four cells (Cells 1-4) within the boundary of the permitted installation	G	20/05/2024	70,000 (IBA)
PL/0105/23	Canwick Sewage Treatment Works, Washingborough Road, Lincoln	For the installation of two canopies and associated blockwork (Zap shelters) to cover existing material storage bays	G	10/05/2024	N/A
PL/0109/23	Tollemach Road South, Grantham	To vary conditions 2 (Approved Plans and Documents) and 5 (Waste Transfer Operations) of planning permission S21/1099	G	11/04/2024	N/A
PL/0002/24	Orange House, Swingbridge Road, Grantham	For the installation of hardstanding for open-air storage associated with existing site operation and construction of 1.8m high bund	G	28/03/2024	N/A
PL/0021/24	New Earth Solutions (West) Ltd, Building No.3, Roe House, Boundary Lane, South Hykeham	For the formation of ancillary open storage area for skips	G	11/04/2024	N/A

Application reference	Site	Description of proposal	Decision	Decision date	Additional annual capacity (tonnes)
PL/0050/24	Swinderby Quarry, Camp Road, Witham St Hughs	To vary conditions 3 and 9 of planning permission 22/1342/CCC to increase the maximum annual throughput limit for inert and non-hazardous construction, demolition and excavation waste from 30,000 tonnes per annum to 75,000 tonnes per annum and to extend temporary consent for a further three years	G	12/08/2024	45,000 (construction, demolition and excavation waste)
PL/0052/24	Nocton Anaerobic Digestion Facility, Land off Nocton Fen Lane, Nocton	For construction of a covered digestate lagoon associated with the existing Nocton Anaerobic Digestion Facility	G	06/11/2024	N/A
PL/0059/24	Caythorpe Water Recycling Centre, Main Street, Caythorpe	For a retrospective planning application to extend Caythorpe Water Recycling Centre for the erection of two operational kiosks, chemical dosing unit and fencing	G	09/10/2024	N/A
PL/0074/24	North Hykeham Landfill, Whisby Road, North Hykeham	For a new compressor shed (retrospective)	G	25/10/2024	N/A

(G = Planning application granted, R = Planning application refused)

Appendix 4: The strategic objectives of the Lincolnshire Minerals and Waste Local Plan

Plan ref:	Objective
a.	Protect the environment and local communities from negative impacts of minerals and waste development, reduce residual impacts and deliver improvements where possible. Ensure new facilities include high standards of design and layout, sustainable construction methods, good working practices and environmental protection measures;
b.	Ensure that the minerals extracted in Lincolnshire supplies industry in line with national guidance and contributes to local and national requirements;
c.	Seek to ensure that minerals are supplied from appropriately located and environmentally acceptable sources;
d.	Through prioritising movement of waste up the waste hierarchy, minimise greenhouse gas emissions by reducing the reliance on landfill; maximise opportunities for the re-use and recycling of waste; facilitate new technologies to maximise the renewable energy potential of waste as a resource; and promote the use of carbon capture technology;
e.	Deliver adequate capacity for managing waste more sustainably when it is needed; to ensure waste is managed as near as possible to where it is produced, including the need for waste water infrastructure;
f.	Safeguard key mineral resources from sterilisation by other forms of development;
g.	Provide for a steady and adequate supply of minerals and ensuring the efficient use of primary minerals and encourage the production and use of good quality secondary and recycled aggregates;
h.	Protect Lincolnshire's high quality agricultural land (Grades 1, 2 and 3a) and soil where practicable from development; and in cases where it is affected, safeguard its long term potential by encouraging restoration back to agriculture, or protection of soils through restoration schemes to biodiversity where soils are cared for in a sustainable manner, enabling habitat creation in addition to soil preservation for future agricultural needs;
i.	Consider the restoration of mineral sites at the beginning of the proposal; after-uses will be identified which best meet local circumstances. The enhancement of existing and the creation of new priority habitats, in line with National Guidance, the Lincolnshire Biodiversity Action Plan, Lincolnshire Geodiversity Action Plan; the national strategy Biodiversity 2020 and green infrastructure will be key objectives;
j.	Ensure the unique historical heritage of Lincolnshire, including its built, archaeological and natural landscape features and their wider settings are protected from the adverse impacts of mineral and waste developments;

Plan ref:	Objective
k.	Ensure that local sources of building stone are available to contribute towards the maintenance and enhancement of locally distinctive buildings. Stone for Lincoln Cathedral will be specifically protected;
l.	Protect Lincolnshire's coastal and fluvial high flood risk areas from inappropriate minerals and waste development and reduce flood risk through development opportunities wherever possible;
m.	Protect and enhance the Lincolnshire Wolds AONB, coastline and other nature conservation areas ranging from International (Natura 2000 sites) through to local designations;
n.	Sustainable alternative modes of transport will be given priority and vehicular-tonne miles movements will be minimised wherever practicable.

Appendix 5: Sustainability appraisal objectives

Number	Objective
1)	Lincolnshire is a large, sparsely populated rural County resulting in access issues for rural communities and contributing to high levels of car ownership. This issue needs to be taken into account in providing for waste management facilities for a dispersed population.
2)	High population growth and increase in waste arisings will lead to demand in more waste management facilities in Lincolnshire as well as demand for minerals to meet house building and other construction demands
3)	There is social exclusion in deeply rural areas and social deprivation particularly in some of the eastern coastal areas, urban centres including Lincoln and Boston and south west of Lincolnshire.
4)	A high proportion of Lincolnshire's waste goes to landfill, there is need to reverse this trend through provision of alternative waste management facilities focusing on those that will facilitate waste management in line with the waste hierarchy
5)	Although Lincolnshire already has high recycling and composting levels, there is need to further increase the amount of waste recycled, re-used and recovered in order to meet the objectives of Sustainable Waste Management
6)	The Minerals and Waste Plan will need to provide a sustainable network of facilities to enable waste to be managed close to its source and in line with the waste hierarchy
7)	Lincolnshire has a diverse range of habitats with high ecological value being attributed to the coastal areas. Conservation of these habitats as well as protected species will be required in order to avoid their decline. Conservation of Ancient woodlands is especially relevant given its relative scarcity in the County.
8)	Lincolnshire has a rich historic and built environment which forms an important part of the County's distinctive environment. Its conservation should be paramount when planning for minerals and waste development to minimise its loss/destruction.
9)	Lincolnshire has 9 landscape character areas and the Lincolnshire Wolds are designated as an AONB. Minerals and waste developments should be planned in a way that will conserve the character areas as well as the AONB.
10)	Development in the County will continue to add pressure to scarce water resources. There will be a need to ensure that minerals and waste developments do not lead to pollution or inefficient use of both surface and groundwater resources.
11)	Climate change poses a genuine threat especially with regard to flooding. There is a need to reduce CO2 emissions as well as ensuring development in the flood plain is minimised

Number	Objective
12)	Minerals and waste are largely transported by road leading to high levels of HGV traffic which result in disturbance as well as contributing to CO2 emissions. There is need for the Plan to encourage use of sustainable transport for minerals and waste.
13)	Much of Lincolnshire's transport network comprises of narrow roads and country lanes and the majority of the strategic roads fall below current design standards. This has a consequence of low speeds and safety problems.
14)	The main concentrations of sand and gravel working are in the Trent Valley, the Lower Bain region and the Baston-Langtoft-West Deeping areas while limestone is mainly worked in the south. Further working in these areas should take account of cumulative effects on the environment and the local communities to ensure that the areas can sustainably cope with continued extraction.
15)	Lincolnshire has a poorly performing economy in relation to the rest of the East Midlands and the country. The Core Strategy should seek to support minerals and waste development through making provision for facilities and areas for mineral working as well as encouraging recycling and recovery technologies that can attract high level skilled labour.
16)	Tourism and recreation are an important component of the Lincolnshire economy. This is supported by the rural nature of the County and an extensive network of Public Rights of Way.
17)	AQMAs have been declared in Lincoln, Boston and Grantham. Minerals and waste Management developments should be planned in a way that does not negatively impact on air quality.
18)	The supply of building and roofing stone is important to maintain local character in parts of the County.

Minerals and Waste Local Plan – Core Strategy & Development Management Policies Document Sustainability Appraisal / Strategic Environmental Assessment
Environmental Report (updated) V.2 (2015)

Appendix 6: Titles of development management and restoration policies

DM1: Presumption in favour of sustainable development

DM2: Climate change

DM3: Quality of life and amenity

DM4: Historic environment

DM5: Lincolnshire Wolds Area of Outstanding Natural Beauty

DM6: Impact on landscape and townscape

DM7: Internationally designated sites of biodiversity conservation value

DM8: Nationally designated sites of biodiversity and geological conservation value

DM9: Local sites of biodiversity conservation value

DM10: Local sites of geological conservation value

DM11: Soils

DM12: Best and most versatile agricultural land

DM13: Sustainable transport movements

DM14: Transport by road

DM15: Flooding and flood Risk

DM16: Water resources

DM17: Cumulative impacts

R1: Restoration and aftercare

R2: After-use

R3: Restoration of sand and gravel operations within areas of search

R4: Restoration of limestone and chalk workings
