

Equality Impact Analysis to enable informed decisions

The purpose of this document is to:-

- I. help decision makers fulfil their duties under the Equality Act 2010 and
- II. for you to evidence the positive and adverse impacts of the proposed change on people with protected characteristics and ways to mitigate or eliminate any adverse impacts.

Using this form

This form must be updated and reviewed as your evidence on a proposal for a project/service change/policy/commissioning of a service or decommissioning of a service evolves taking into account any consultation feedback, significant changes to the proposals and data to support impacts of proposed changes. The key findings of the most up to date version of the Equality Impact Analysis must be explained in the report to the decision maker and the Equality Impact Analysis must be attached to the decision making report.

****Please make sure you read the information below so that you understand what is required under the Equality Act 2010****

Equality Act 2010

The Equality Act 2010 applies to both our workforce and our customers. Under the Equality Act 2010, decision makers are under a personal duty, to have due (that is proportionate) regard to the need to protect and promote the interests of persons with protected characteristics.

Protected characteristics

The protected characteristics under the Act are: age; disability; gender reassignment; marriage and civil partnership; pregnancy and maternity; race; religion or belief; sex; sexual orientation.

Section 149 of the Equality Act 2010

Section 149 requires a public authority to have due regard to the need to:

- Eliminate discrimination, harassment, victimisation, and any other conduct that is prohibited by/or under the Act
- Advance equality of opportunity between persons who share relevant protected characteristics and persons who do not share those characteristics
- Foster good relations between persons who share a relevant protected characteristic and persons who do not share it.

The purpose of Section 149 is to get decision makers to consider the impact their decisions may or will have on those with protected characteristics and by evidencing the impacts on people with protected characteristics decision makers should be able to demonstrate 'due regard'.

Decision makers duty under the Act

Having had careful regard to the Equality Impact Analysis, and also the consultation responses, decision makers are under a personal duty to have due regard to the need to protect and promote the interests of persons with protected characteristics (see above) and to:-

- (i) consider and analyse how the decision is likely to affect those with protected characteristics, in practical terms,
- (ii) remove any unlawful discrimination, harassment, victimisation and other prohibited conduct,
- (iii) consider whether practical steps should be taken to mitigate or avoid any adverse consequences that the decision is likely to have, for persons with protected characteristics and, indeed, to consider whether the decision should not be taken at all, in the interests of persons with protected characteristics,
- (iv) consider whether steps should be taken to advance equality, foster good relations and generally promote the interests of persons with protected characteristics, either by varying the recommended decision or by taking some other decision.

Conducting an Impact Analysis

The Equality Impact Analysis is a process to identify the impact or likely impact a project, proposed service change, commissioning, decommissioning or policy will have on people with protected characteristics listed above. It should be considered at the beginning of the decision making process.

The Lead Officer responsibility

This is the person writing the report for the decision maker. It is the responsibility of the Lead Officer to make sure that the Equality Impact Analysis is robust and proportionate to the decision being taken.

Summary of findings

You must provide a clear and concise summary of the key findings of this Equality Impact Analysis in the decision making report and attach this Equality Impact Analysis to the report.

Impact – definition

An impact is an intentional or unintentional lasting consequence or significant change to people's lives brought about by an action or series of actions.

How much detail to include?

The Equality Impact Analysis should be proportionate to the impact of proposed change. In deciding this asking simple questions “Who might be affected by this decision?” “Which protected characteristics might be affected?” and “How might they be affected?” will help you consider the extent to which you already have evidence, information and data, and where there are gaps that you will need to explore. Ensure the source and date of any existing data is referenced.

You must consider both obvious and any less obvious impacts. Engaging with people with the protected characteristics will help you to identify less obvious impacts as these groups share their perspectives with you.

A given proposal may have a positive impact on one or more protected characteristics and have an adverse impact on others. You must capture these differences in this form to help decision makers to arrive at a view as to where the balance of advantage or disadvantage lies. If an adverse impact is unavoidable then it must be clearly justified and recorded as such, with an explanation as to why no steps can be taken to avoid the impact. Consequences must be included.

Proposals for more than one option If more than one option is being proposed you must ensure that the Equality Impact Analysis covers all options. Depending on the circumstances, it may be more appropriate to complete an Equality Impact Analysis for each option.

The information you provide in this form must be sufficient to allow the decision maker to fulfil their role as above. You must include the latest version of the Equality Impact Analysis with the report to the decision maker. Please be aware that the information in this form must be able to stand up to legal challenge.

Title of the policy / project / service being considered	Joint Flood Risk & Water Management Strategy 2019-2050	Person / people completing analysis	Matthew Harrison
Service Area	Places Directorate	Lead Officer	Matthew Harrison
Who is the decision maker?	Executive	How was the Equality Impact Analysis undertaken?	Online questionnaire supporting the public consultation exercise
Date of meeting when decision will be made	17/12/2019	Version control	v.2 Post Public consultation
Is this proposed change to an existing policy/service/project or is it new?	Existing policy/service/project	LCC directly delivered, commissioned, re-commissioned or de-commissioned?	Directly delivered
Describe the proposed change	<p>This is a revision and update to the existing Joint Flood Risk & Water Management Strategy adopted by the Council in 2012/13. The new strategy builds on successful delivery of the key objectives set out in the earlier document. It takes a wider view, not only covering partners' collaborative strategic and operational approach to flood risk management, but also strategic management of water as a resource to support economic growth and to help secure long term resilience of water supply within a new national framework.</p> <p>This EIA is being completed post public consultation, assessing the responses received as part of the online survey/questionnaire and public engagement drop in sessions supporting the public consultation exercise.</p>		

Evidencing the impacts

In this section you will explain the difference that proposed changes are likely to make on people with protected characteristics. To help you do this first consider the impacts the proposed changes may have on people without protected characteristics before then considering the impacts the proposed changes may have on people with protected characteristics.

You must evidence here who will benefit and how they will benefit. If there are no benefits that you can identify please state 'No perceived benefit' under the relevant protected characteristic. You can add sub categories under the protected characteristics to make clear the impacts. For example under Age you may have considered the impact on 0-5 year olds or people aged 65 and over, under Race you may have considered Eastern European migrants, under Sex you may have considered specific impacts on men.

Data to support impacts of proposed changes

When considering the equality impact of a decision it is important to know who the people are that will be affected by any change.

Population data and the Joint Strategic Needs Assessment

The Lincolnshire Research Observatory (LRO) holds a range of population data by the protected characteristics. This can help put a decision into context. Visit the LRO website and its population theme page by following this link: <http://www.research-lincs.org.uk> If you cannot find what you are looking for, or need more information, please contact the LRO team. You will also find information about the Joint Strategic Needs Assessment on the LRO website.

Workforce profiles

You can obtain information by many of the protected characteristics for the Council's workforce and comparisons with the labour market on the [Council's website](#). As of 1st April 2015, managers can obtain workforce profile data by the protected characteristics for their specific areas using Agresso.

Age	The JLFRWM Strategy aims to better manage the risk of flooding and improve the community's preparation for, and resilience to, flood events and improve the management of water resources. Potential effects would therefore be beneficial.
Disability	The JLFRWM Strategy aims to better manage the risk of flooding and improve the community's preparation for, and resilience to, flood events and improve the management of water resources. Potential effects would therefore be beneficial.
Gender reassignment	The JLFRWM Strategy aims to better manage the risk of flooding and improve the community's preparation for, and resilience to, flood events and improve the management of water resources. Potential effects would therefore be beneficial.
Marriage and civil partnership	The JLFRWM Strategy aims to better manage the risk of flooding and improve the community's preparation for, and resilience to, flood events and improve the management of water resources. Potential effects would therefore be beneficial.
Pregnancy and maternity	The JLFRWM Strategy aims to better manage the risk of flooding and improve the community's preparation for, and resilience to, flood events and improve the management of water resources. Potential effects would therefore be beneficial.
Race	The JLFRWM Strategy aims to better manage the risk of flooding and improve the community's preparation for, and resilience to, flood events and improve the management of water resources. Potential effects would therefore be beneficial.
Religion or belief	The JLFRWM Strategy aims to better manage the risk of flooding and improve the community's preparation for, and resilience to, flood events and improve the management of water resources. Potential effects would therefore be beneficial.

Sex	The JLFRWM Strategy aims to better manage the risk of flooding and improve the community's preparation for, and resilience to, flood events and improve the management of water resources. Potential effects would therefore be beneficial.
Sexual orientation	The JLFRWM Strategy aims to better manage the risk of flooding and improve the community's preparation for, and resilience to, flood events and improve the management of water resources. Potential effects would therefore be beneficial.

If you have identified positive impacts for other groups not specifically covered by the protected characteristics in the Equality Act 2010 you can include them here if it will help the decision maker to make an informed decision.

Negative impacts of the proposed change and practical steps to mitigate or avoid any adverse consequences on people with protected characteristics are detailed below. If you have not identified any mitigating action to reduce an adverse impact please state *'No mitigating action identified'*.

Age	No perceived adverse impact'
Disability	No perceived adverse impact'
Gender reassignment	No perceived adverse impact'
Marriage and civil partnership	As part of the responses received to the public consultation survey one response was received identifying a negative impact but no further information was forthcoming as to how the strategy would specifically impact marriage and civil partnership. No mitigating action identified

Pregnancy and maternity	No perceived adverse impact'
Race	No perceived adverse impact'
Religion or belief	No perceived adverse impact'
Sex	No perceived adverse impact'
Sexual orientation	No perceived adverse impact'

If you have identified negative impacts for other groups not specifically covered by the protected characteristics under the Equality Act 2010 you can include them here if it will help the decision maker to make an informed decision.

Stakeholders

Stake holders are people or groups who may be directly affected (primary stakeholders) and indirectly affected (secondary stakeholders)

You must evidence here who you involved in gathering your evidence about benefits, adverse impacts and practical steps to mitigate or avoid any adverse consequences. You must be confident that any engagement was meaningful. The Community engagement team can help you to do this and you can contact them at consultation@lincolnshire.gov.uk

State clearly what (if any) consultation or engagement activity took place by stating who you involved when compiling this EIA under the protected characteristics. Include organisations you invited and organisations who attended, the date(s) they were involved and method of involvement i.e. Equality Impact Analysis workshop/email/telephone conversation/meeting/consultation. State clearly the objectives of the EIA consultation and findings from the EIA consultation under each of the protected characteristics. If you have not covered any of the protected characteristics please state the reasons why they were not consulted/engaged.

Objective(s) of the EIA consultation/engagement activity

Primary Stakeholder organisations involved in the development of the draft strategy are part of the Lincolnshire Flood Risk & Water Management Partnership namely, the Environment Agency, Internal Drainage Boards, District Councils and Water Companies

As part of the formal public consultation exercise on the strategy an online survey/questionnaire was devised, which included a section dedicated to obtaining information under the Equality Act 2010 to ascertain how people with 'protected characteristics' are impacted by the organisations activity. Question 15 of the survey asked the question 'Do you think the draft strategy could have a positive or negative impact on you (or someone you care for or support) with regard to any of the following? Please tick all that apply' All areas of protected characteristics as described in the below table were included with a request to identify either a Positive impact, Negative impact, No impact or Don't know. A summary of responses received is detailed in the table below.

Age	As part of the responses received to the public consultation survey neither Positive, Negative, No impact or Don't Know were completed by respondents
Disability	As part of the responses received to the public consultation survey one response was received identifying a positive impact but no further information was forthcoming as to how the strategy would specifically impact with regard to disability
Gender reassignment	As part of the responses received to the public consultation survey neither Positive, Negative, No impact or Don't Know were completed by respondents
Marriage and civil partnership	As part of the responses received to the public consultation survey one response was received identifying a negative impact but no further information was forthcoming as to how the strategy would specifically impact marriage and civil partnership. No mitigating action identified
Pregnancy and maternity	As part of the responses received to the public consultation survey one response was received identifying a positive impact but no further information was forthcoming as to how the strategy would specifically impact pregnancy and maternity
Race	As part of the responses received to the public consultation survey neither Positive, Negative, No impact or Don't Know were completed by respondents
Religion or belief	As part of the responses received to the public consultation survey neither Positive, Negative, No impact or Don't Know were completed by respondents

Sex	As part of the responses received to the public consultation survey neither Positive, Negative, No impact or Don't Know were completed by respondents
Sexual orientation	As part of the responses received to the public consultation survey neither Positive, Negative, No impact or Don't Know were completed by respondents
Are you confident that everyone who should have been involved in producing this version of the Equality Impact Analysis has been involved in a meaningful way? The purpose is to make sure you have got the perspective of all the protected characteristics.	Yes
Once the changes have been implemented how will you undertake evaluation of the benefits and how effective the actions to reduce adverse impacts have been?	All responses to the supporting public consultation survey/questionnaire and public drop in sessions have been evaluated. The majority of responses did not identify any form of perceived impact. Two positive impacts were identified but with no supporting evidence and one negative impact was identified for marriage and civil partnerships, but again no supporting information was supplied. As the overall aim of the strategy is to provide positive and beneficial impacts to residents in Lincolnshire on this occasion no mitigating action has been identified.

Are you handling personal data?	<p>No</p> <p>If yes, please give details.</p>
