

Child Home Injury Prevention (CHIP) Training

E: learning is available to support Lincolnshire Safeguarding Children Partnership's campaign to raise awareness of Child Home Injury Prevention.

Accidents in and around the home are a leading cause of preventable death for children under five years old, and are a major cause of ill health and serious disability.

This module examines common causes of injury for the under 5s and what can be done to prevent them.

By the end of the module you will be able to:

- Identify what causes the most common and serious injuries in the under 5s and what can be done to prevent them
- Explain the link between child development and injuries
- Find useful resources to help you prevent accidents

This course is for anyone who works with children under 5 years of age or supports families with children under 5.

This includes:

- Health Visitors
- Family Health Workers
- Early Years Practitioners
- Early Help Workers
- Social Workers
- Volunteer family champions and mentors
- Childminders
- Nursery staff
- Nannies
- Foster carers
